Performative Linguistics Douglas Robinson, 2003-09-02

In this book Douglas Robinson introduces a new distinction between constative and performative linguistics arguing that Austin's distinction can be used to understand linguistic methodologies. Constative linguistics Robinson suggests includes methodologies aimed at freezing language as an abstract sign system while performative linguistics explores how language is used or performed in those speech situations. Robinson then tests his hypothesis on the act of translation. Drawing on a range of language scholars and theorists *Performative Linguistics* consolidates the many disparate action approaches to language into a new paradigm for the study of language.

Oscar Wilde in Vienna Sandra Mayer, 2018-07-17

Oscar Wilde in Vienna is the first book length study in English of the reception of Oscar Wilde's works in the German speaking world. Charting the plays history on Viennese stages between 1903 and 2013 it casts a spotlight on the international reputation of one of the most popular English language writers while contributing to Austrian cultural history in the long twentieth century. Drawing on extensive archival material the book examines the appropriation of Wilde's plays against the background of political crises and social transformations. It unravels the mechanisms of cultural transfer and canonisation within an environment positioned like Wilde himself at the crossroads of centre and periphery tradition and modernity.

Translationality

Douglas Robinson, 2017-05-18 This book defines translationality by weaving a number of sub and interdisciplinary interests through the medical humanities: medicine in literature, the translational history of medical literature, a medical neuroscience approach to literary translation and translational hermeneutics and a humanities phenomenological performative approach to translational medicine. It consists of three long essays: the first on the traditional medicine in literature side of the medical humanities with a close look at a recent novel built around the Capgras delusion and other neurological misidentification disorders; the second beginning with the traditional history of medicine side of the medical humanities but segueing into literary history, translation history and translation theory; the third on the social neuroscience of translational hermeneutics. The conclusion links the discussion up with a humanistic performative phenomenological take on translational medicine.
