Federal Register ,2012-03 **California's Fading Wildflowers** Richard A. Minnich,2008-06-18 Early Spanish explorers in the late eighteenth century found springtime California covered with spectacular carpets of wildflowers from San Francisco to San Diego Yet today invading plant species have devastated this nearly forgotten botanical heritage In this lively vividly detailed work Richard A Minnich synthesizes a unique and wide ranging array of sources from the historic accounts of those early explorers to the writings of early American botanists in the nineteenth century newspaper accounts in the twentieth century and modern ecological theory to give the most comprehensive historical analysis available of the dramatic transformation of California's wildflower prairies At the same time his groundbreaking book challenges much current thinking on the subject critically evaluating the hypothesis that perennial bunchgrasses were once a dominant feature of California's landscape and instead arguing that wildflowers filled this role As he examines the changes in the state's landscape over the past three centuries Minnich brings new perspectives to topics including restoration ecology conservation

and fire management in a book that will change our view of native California
