Sap Release Implementation Guide:

SAP on Azure Implementation Guide Nick Morgan, Bartosz Jarkowski, 2020-02-21 Learn how to migrate your SAP data to Azure simply and successfully Key Features Learn why Azure is suitable for business critical systems Understand how to migrate your SAP infrastructure to Azure Use Lift shift migration Lift migrate Lift migrate to HANA or Lift transform to S4HANA Book Description Cloud technologies have now reached a level where even the most critical business systems can run on them For most organizations SAP is the key business system If SAP is unavailable for any reason then potentially your business stops Because of this it is understandable that you will be concerned whether such a critical system can run in the public cloud However the days when you truly ran your IT system on premises have long since gone Most organizations have been getting rid of their own data centers and increasingly moving to co location facilities In this context the public cloud is nothing more than an additional virtual data center connected to your existing network There are typically two main reasons why you may consider migrating SAP to Azure You need to replace the infrastructure that is currently running SAP or you want to migrate SAP to a new database Depending on your goal SAP offers different migration paths You can decide either to migrate the current workload to Azure as is or to combine it with changing the database and execute both activities as a single step SAP on Azure Implementation Guide covers the main migration options to lead you through migrating your SAP data to Azure simply and successfully What you will learn Successfully migrate your SAP infrastructure to Azure Understand the security benefits of Azure See how Azure can scale to meet the most demanding of business needs Ensure your SAP infrastructure maintains high availability Increase business agility through cloud capabilities Leverage cloud native capabilities to enhance SAP Who this book is for SAP on Azure Implementation Guide is designed to benefit existing SAP architects looking to migrate their SAP infrastructure to Azure Whether you are an architect implementing the migration or an IT decision maker evaluating the benefits of migration this book is for you Auditing and GRC Automation in SAP Maxim Chuprunov, 2013-04-09 Over the last few years financial statement scandals cases of fraud and corruption data protection violations and other legal violations have led to numerous liability cases damages claims and losses of reputation As a reaction to these developments several regulations have been issued Corporate Governance the Sarbanes Oxley Act IFRS Basel II and III Solvency II and BilMoG to name just a few In this book compliance is understood as the process mapped not only in an internal control system that is intended to guarantee conformity with legal requirements but also with internal policies and enterprise objectives in particular efficiency and profitability The current literature primarily confines itself to mapping controls in SAP ERP and auditing SAP systems Maxim Chuprunov not only addresses this subject but extends the aim of internal controls from legal compliance to include efficiency and profitability and then well beyond because a basic understanding of the processes involved in IT supported compliance management processes are not delivered along with the software Starting with the requirements for compliance Part I he not only answers compliance relevant questions in the form

of an audit guide for an SAP ERP system and in the form of risks and control descriptions Part II but also shows how to automate the compliance management process based on SAP GRC Part III He thus addresses the current need for solutions for implementing an integrated GRC system in an organization especially focusing on the continuous control monitoring topics Maxim Chuprunov mainly targets compliance experts auditors SAP project managers and consultants responsible for GRC products as readers for his book They will find indispensable information for their daily work from the first to the last page In addition MBA management information system students as well as senior managers like CIOs and CFOs will find a wealth of valuable information on compliance in the SAP ERP environment on GRC in general and its implementation in particular

Implementing High Availability and Disaster Recovery Solutions with SAP HANA on IBM Power Systems Dino Quintero,Luis Bolinches,Rodrigo Ceron Ferreira de Castro,Fabio Martins,John Wright,IBM Redbooks,2018-02-05 This IBM Redpaper™ publication addresses topics for architects brand specialists distributors resellers and anyone developing and implementing SAP HANA on IBM Power Systems™ integration automation high availability HA and disaster recovery DR solutions This book provides documentation to transfer how to skills to the technical teams and documentation to the sales team This guide describes how to implement an SAP HANA on IBM Power Systems solution from end to end and includes HA and DR guidelines by using theoretical knowledge field experience and sample scenarios The contents of this book follow the guidelines from SAP regarding HANA installation on IBM Power Systems plus

all the preferred practices that are gathered from the experiences of those consultants in hundreds of past HANA installations in customers environments This book is a hands on guide and is targeted at technical staff who want to install SAP HANA on IBM Power Systems and also use SAP HANA and IBM Power Systems HA solutions SAP HANA and SUSE screen captures that are used in this publication belong to their respective owners The residency team showed them in the publication to demonstrate the implementation and integration parts of the solution with IBM Power Systems *Enterprise Resource Planning and Supply Chain Management* Karl E. Kurbel, 2013-08-23 This book is about running modern industrial enterprises with the help of information systems Enterprise resource planning ERP is the core of business information processing An ERP system is the backbone of most companies information systems landscape All major business processes are handled with the help of this system Supply chain management SCM looks beyond the individual company taking into account that enterprises are increasingly concentrating on their core competencies leaving other activities to suppliers With the growing dependency on the partners effective supply chains have become as important for a company s success as efficient in house processes This book covers typical business processes and shows how these processes are implemented Examples are presented using the leading systems on the market SAP ERP and SAP SCM In this way the reader can understand how business processes are actually carried out in the real world IBM Software for SAP Solutions Yaro Dunchych, Peter Bahrs, Khirallah Birkler, Bernd Eberhardt, Navneet Goyal, James Hunter, Derek Jennings, Joe Kaczmarek, Michel Laaroussi, Michael Love, Stefan Momma, Nick Norris, Martin Oberhofer, Manfred Oevers, Paul Pacholski, Andrew Stalneck, Jörg Stolzenberg, Pierre Valiquette, IBM Redbooks, 2015-09-29 SAP is a market leader in enterprise business application software SAP solutions provide a rich set of composable application modules and configurable functional capabilities that are expected from a comprehensive enterprise business application software suite In most cases companies that adopt SAP software remain heterogeneous enterprises running both SAP and non SAP systems to support their business processes Regardless of the specific scenario in heterogeneous enterprises most SAP implementations must be integrated with a variety of non SAP enterprise systems Portals Messaging infrastructure Business process management BPM tools Enterprise Content Management ECM methods and tools Business analytics BA and business intelligence BI technologies Security Systems of record Systems of engagement The tooling included with SAP software addresses many needs for creating SAP centric environments However the classic approach to implementing SAP functionality generally leaves the business with a rigid solution that is difficult and expensive to change and enhance When SAP software is used in a large heterogeneous enterprise environment SAP clients face the dilemma of selecting the correct set of tools and platforms to implement SAP functionality and to integrate the SAP solutions with non SAP systems This IBM Redbooks publication explains the value of integrating IBM software with SAP solutions It describes how to enhance and extend pre built capabilities in SAP software with best in class IBM enterprise software enabling clients to maximize return on investment

ROI in their SAP investment and achieve a balanced enterprise architecture approach This book describes IBM Reference Architecture for SAP a prescriptive blueprint for using IBM software in SAP solutions The reference architecture is focused on defining the use of IBM software with SAP and is not intended to address the internal aspects of SAP components The chapters of this book provide a specific reference architecture for many of the architectural domains that are each important for a large enterprise to establish common strategy efficiency and balance The majority of the most important architectural domain topics such as integration process optimization master data management mobile access Enterprise Content Management business intelligence DevOps security systems monitoring and so on are covered in the book However there are several other architectural domains which are not included in the book This is not to imply that these other architectural domains are not important or are less important or that IBM does not offer a solution to address them It is only reflective of time constraints available resources and the complexity of assembling a book on an extremely broad topic Although more content could have been added the authors feel confident that the scope of architectural material that has been included should provide organizations with a fantastic head start in defining their own enterprise reference architecture for many of the important architectural domains and it is hoped that this book provides great value to those reading it This IBM Redbooks publication is targeted to the following audiences Client decision makers and solution architects leading enterprise transformation projects and wanting to gain further insight so that they can benefit from the integration of IBM software in large scale SAP projects IT architects and consultants integrating IBM technology with SAP solutions
