Securing an IT Organization through Governance, Risk Management, and Audit Ken E. Sigler, James L. Rainey III, 2016-01-05 This book introduces two internationally recognized bodies of knowledge COBIT 5 from a cybersecurity perspective and the NIST Framework for Improving Critical Infrastructure Cybersecurity CSF Emphasizing the processes directly related to governance risk management and audit the book maps the CSF steps and activities to the methods defined in COBIT 5 extending the CSF objectives with practical and measurable activities that leverage operational risk understanding in a business context This allows the ICT organization to convert high level enterprise goals into manageable specific goals rather than unintegrated checklist models

Enterprise Process Management Systems Vivek Kale, 2018-10-10 Enterprise Process Management Systems Engineering Process Centric Enterprise Systems using BPMN 2 0 proposes a process centric paradigm to replace the traditional data centric paradigm for Enterprise Systems ES ES should be reengineered from the present data centric enterprise architecture to process centric process architecture to be called as Enterprise Process Management Systems EPMS The real significance of business processes can be understood in the context of current heightened priority on digital transformation or digitalization of enterprises Conceiving the roadmap to realize a digitalized enterprise via the business model innovation becomes amenable only from the process centric view of the enterprise This pragmatic book Introduces Enterprise Process Management Systems EPMS solutions that enable an agile enterprise Describes distributed systems and Service Oriented Architecture SOA that paved the road to EPMS Leverages SOA to explain the cloud based realization of business processes in terms of Web Services Describes how BPMN 2 0 addresses the requirements for agility by ensuring a seamless methodological path from process requirements modeling to execution and back to enable process improvements Presents the spreadsheet driven Spreadsheets Application Development SAD methodology for the design and development of process centric application systems Describes process improvement programs ranging right from disruptive programs like BPR to continuous improvement programs like lean six sigma and TOC

Enterprise Process Management Systems Engineering Process Centric Enterprise Systems using BPMN 2.0 describes how BPMN 2.0 can not only capture business requirements but it can also provide the backbone of the actual solution implementation. Thus the same diagram prepared by the business analyst to describe the business's desired To Be process can also be used to automate the execution of that process on a modern process engine.

Digital Transformation in Data-Driven Financial Compliance: A Business Analyst's Guide 2025 Author :1- SANJAY C. VICHARE Author :2- PROF. NITIN JAIN, PREFACE The world of finance is undergoing a profound transformation. As businesses adapt to an increasingly complex and interconnected global economy, the traditional models of financial management, risk assessment, and reporting are being challenged. Driven by rapid technological advancements, artificial intelligence (AI), advanced analytics, and enterprise solutions like SAP are reshaping how organizations approach finance. These technologies are not merely enhancing existing practices; they are fundamentally changing the way businesses operate, make decisions, and drive growth. This book, *Digital Transformation in Data-Driven Financial Compliance: A Business Analyst's Guide*, aims to provide an in-depth exploration of how emerging technologies are revolutionizing financial functions across industries. By diving deep into the ways in which AI, analytics, and SAP solutions enable businesses to thrive in an increasingly digital and data-driven world, this book offers both theoretical insights and practical strategies for financial leaders, executives, and professionals navigating the future of finance. At the heart of this transformation is the need to do more with less, to make faster, more informed decisions to ensure regulatory compliance while managing risk, and to unlock the true potential of financial data. With the advent of AI, companies can harness vast amounts of data to predict trends, automate processes, and uncover insights that were previously out of reach. Through this book, we explore how these technologies are helping finance professionals shift from the back office to the boardroom, becoming key players in shaping corporate strategy. We delve into the AI-driven insights that are making finance more agile, the analytics tools that are enabling better forecasting and decision-making, and the SAP solutions that are connecting finance to the broader organization, breaking down silos and ensuring that financial processes align with business goals.
