Public Perception Climate Change Communication:

Public Perception of Climate Change Bjoern Hagen, 2015-11-06 Despite the findings on global climate change presented by the scientific community there remains a significant gap between its recommendations and the actions of the public and policy makers So far scientists and the media have failed to successfully communicate the urgency of the climate change situation in such a way that long term comprehensive and legally binding policy commitments are being made on the national and international level This book examines the way the public processes information how they perceive threats and other perceptual factors that have a significant effect on how and to what degree climate change mitigation and adaptation strategies are supported Understanding public risk perception plays a vital role in communicating the challenges of global climate change Using a diverse range of international case studies this book explores the nature of public perceptions of climate change and identifies the perception factors which have a significant impact on the public's willingness to support global climate change policies or commit to behavioral changes to reduce greenhouse gas emissions and improve urban resiliency The comparative study of social and cultural factors beliefs attitudes and trust provides an international overview of best practices regarding the design implementation and generation of public support for climate change policies at a global level Offering valuable insight into climate change and risk communication the book should be of interest to students and scholars of environment studies politics urban planning and media and cultural studies *China's Transition on Climate Change Communication and Governance* Binbin Wang, 2020-12-13 This book provides a two level analytical framework and empirical study to analyze the reason and process of China's transition that is from a follower to driver in the field of global climate governance and is especially valuable the dialogues and cooperation between the government media and civil society Nowadays China shows strong leadership to push the process of global climate governance It's the first and fastest time in the past 40 year history of China's Opening up that China wins the international respect and trust in one of the issues of global governance What experiences can be summarized What dynamic situations and new possibilities emerged after Trump the U S president announced to withdraw from the Paris Agreement How to move forward based on the existing success This timely book offers new lens for international readers to understand China's effort domestically and internationally in the field of climate change and illustrate the outlook of the climate governance in the frame of win win co governance model

Handbook of Climate Change Communication: Vol. 1 Walter Leal Filho, Evangelos Manolas, Anabela Marisa Azul, Ulisses M. Azeiteiro, Henry McGhie, 2017-12-29 This comprehensive handbook provides a unique overview of the theory methodologies and best practices in climate change communication from around the world It fosters the exchange of information ideas and experience gained in the execution of successful projects and initiatives and discusses novel methodological approaches aimed at promoting a better understanding of climate change adaptation Addressing a gap in the literature on climate change communication and pursuing an integrated approach the handbook documents and disseminates

the wealth of experience currently available in this field Volume 1 of the handbook provides a unique description of the theoretical basis and of some of the key facts and phenomena which help in achieving a better understanding of the basis of climate change communication providing an essential basis for successful initiatives in this complex field Exploring the

Role of Visualization in Climate Change Communication – an Audience Perspective Anne Gammelgaard

Ballantyne, 2018-05-08 Climate change communication is a topical and relevant issue and it is widely acknowledged that public communication about causes impacts and action alternatives is integral to addressing the challenges of the changing climate Climate visualization concerns the communication of climate information and data through the use of different information technologies and different modes of visual representation In the context of climate change communication climate visualization is highlighted as a potential way of increasing public engagement with climate change In particular developments within information technology have provided significant advancements that are claimed to be transformative in engaging lay audiences with issues relating to the mitigation of and adaptation to climate change Nevertheless there is a lack of research exploring climate visualization from an audience perspective This thesis addresses this gap The overarching aim is thus to explore the role of climate visualization in climate change communication from an audience perspective focusing specifically on how lay audiences make meaning of climate change as represented in two examples of climate visualization In addition the thesis discusses the potential contributions and or limitations of climate visualization from a communication perspective Based on a social semiotic theoretical framework this thesis employs focus group interviews to study participants meaning making related to two cases of climate visualization a dome theatre movie developed for Swedish high school students with the aim of encouraging reflection on climate change causes impacts and mitigation alternatives and a web based tool for climate change adaptation developed to assist Nordic homeowners in adapting to the local impacts of climate change The results of this thesis show that climate visualization can help audiences concretize otherwise abstract aspects of climate change and that the localized focus can make climate change appear more personally relevant and interesting for targeted audiences Nevertheless despite these communicative qualities the analyses also show that participants interpretations are shaped by their preconceptions of climate change as a global and distant issue to be solved by other actors such as national governments or through international policy negotiations Although climate visualization can enhance a sense of proximity with climate change the localization of climate risk can also lead to participants downplaying the significance of climate impacts In addition despite the intentions of inducing a sense of agency in both cases of climate visualization participants critically negotiated messages concerning their roles as individuals in mitigating or adapting to climate change and assigned this responsibility onto other actors These findings show that although climate visualization presents certain communicative qualities it is not a panacea for engaging lay audiences with climate change This also underlines the importance of considering cultural and social aspects of the communicative event when studying and

developing climate visualization tools as a means of communication Kommunikation kring klimatfrågor är ett aktuellt och relevant ämne och många bedömare anser att kommunikation kring orsaker effekter och möjliga alternativ är en viktig del i arbetet med att möta klimatutmaningarna Klimatvisualisering är en process för att skildra klimatinformation och klimatdata med hjälp av olika tekniker och metoder för visuell framställning I forskningslitteraturen om klimatkommunikation lyfts visualisering fram som ett möjligt sätt att öka allmänhetens engagemang i klimatfrågorna I synnerhet har utvecklingen inom informationsteknik lett till betydande framsteg som kan ses som omvälvande när det gäller att engagera lekman i frågor som rör utsläppsminskningar och klimatanpassning Det är dock brist på forskning om klimatvisualisering ur ett mottagarperspektiv Denna avhandling adresserar denna kunskapslucka Det övergripande syftet är att utforska visualiseringens roller i klimatkommunikation ur ett mottagarperspektiv med särskilt fokus på hur lekman tolkar innebörden av klimatfrågor som de representeras i tv exempel på klimatvisualisering Avhandlingen behandlar även klimatvisualiseringens möjliga bidrag och eller begränsningar ur ett kommunikationsperspektiv Med utgångspunkt i ett teoretiskt ramverk som inspirerats av socialsemiotiska teorier genomfördes fokusgruppsstudier för att studera deltagarnas meningsskapande i relation till tv exempel på klimatvisualisering en film som visas i en domteater framtagen för svenska gymnasieelever med möjligheten att uppmuntra till reflektion kring klimatfrågornas orsaker effekter och alternativ för utsläppsminskning samt ett webbaserat verktyg för klimatanpassning som utvecklats för att stödja hushåll i Norden att anpassa sig till klimatfrågornas lokala effekter Resultaten av denna avhandling visar att klimatvisualisering kan stödja mottagarna att konkretisera annars abstrakta aspekter av klimatfrågor och att ett lokalt fokus kan för klimatfrågorna att framstå som mer personligt relevanta och intressanta för målgruppen Dock visar analyserna även trots dessa kommunikativa kvaliteter att deltagarnas tolkningar formas av deras förkunskaper om klimatfrågor som ett globalt och avlägset problem som ska lösas av andra aktörer såsom nationella regeringar eller genom internationella politiska förhandlingar även om klimatvisualisering kan förstås som en inslag i allmänhetens tillit till klimatfrågor kan lokaliseringen av klimatriskerna även leda till att deltagare tonar ned de lokala klimatriskernas betydelse Dessutom trots att både fallen av klimatvisualisering avseende att skapa en känsla av att kunna påverka blev svaret för klimatfrågorna för de flesta kritiska förhandlingarna från deltagarnas sida de flesta svaren för att hantera klimatutmaningarna till andra aktörer Dessa resultat visar att klimatvisualisering visserligen har vissa kommunikativa kvaliteter men inte någon egentlig för klimatkommunikation Detta understryker även vikten av att ta hänsyn till kulturella och sociala aspekter av den kommunikativa handlingen när man studerar och utvecklar verktyg för klimatvisualisering

Climate Change and the Media Tammy Boyce, Justin Lewis, 2009 It is now more than a quarter of a century since the Intergovernmental Panel on Climate Change published their first comprehensive report on the dangers posed by anthropogenic global warming Over the last twenty five years the weight of evidence about the causes and consequences of climate change has become compelling The solutions are fairly simple we must switch to more sustainable

and efficient forms of energy production And yet they remain elusive globally we produce significantly more greenhouse gases now than we did back in 1990 The sad truth is that this inaction has made climate change inevitable the only question that remains is whether we can prevent it spiraling out of control How do we explain this colossal global failure The problem is political rather than scientific we know the risks and we know how to address them but we lack the political will to do so The media are pivotal in this equation they have the power to set the public and the political agenda Climate Change and the Media Volume 2 gathers contributions from a range of international scholars to explore the media s role in our understanding of the problem and our willingness to take action Combined these chapters explain how and why media coverage has to date fallen short in communicating both the science and the politics of climate change They also offer guidance about how the media might shift from being the problem to becoming part of the solution Publisher s website

Research Handbook on Communicating Climate Change David C. Holmes, Lucy M. Richardson, 2020-12-25 Drawing together key frameworks and disciplines that illuminate the importance of communication around climate change this Research Handbook offers a vital knowledge base to address the urgency of conveying climate issues to a variety of audiences *Handbook of Climate Change Communication: Vol. 3* Walter Leal Filho, Evangelos Manolas, Anabela Marisa Azul, Ulisses M. Azeiteiro, Henry McGhie, 2018-01-09 This comprehensive handbook provides a unique overview of the theory methodologies and best practices in climate change communication from around the world It fosters the exchange of information ideas and experience gained in the execution of successful projects and initiatives and discusses novel methodological approaches aimed at promoting a better understanding of climate change adaptation Addressing a gap in the literature on climate change communication and pursuing an integrated approach the handbook documents and disseminates the wealth of experience currently available in this field Volume 3 of the handbook provides case studies from around the world documenting and disseminating the wealth of experiences available

Reframing the Problem of Climate Change Klaus Hasselmann, Carlo Jaeger, Gerd Leipold, Diana Mangalagiu, Joan David Tàbara, 2013-06-17 This book provides an evaluation of the science and policy debates on climate change and offers a reframing of the challenges they pose as understood by key international experts and players in the field It also gives an important and original perspective on interpreting climate action and provides compelling evidence of the weakness of arguments that frame climate policy as a win or lose situation At the same time the book goes beyond providing yet another description of climate change trends and policy processes Its goal is to make available in a series of in depth reflections and insights by key international figures representing science business finance and civil society what is really needed to link knowledge to action Different contributions convincingly show that it is time and possible to reframe the climate debate in a completely new light perhaps as a system transformative attractor for new green growth sustainable development and technological innovation Reframing the Problem of Climate Change reflects a deep belief that dealing with climate change does not have to be a zero sum game with winners and losers The contributors

argue that our societies can learn to respond to the challenge it presents and avoid both human suffering and large scale destruction of ecosystems and that this does not necessarily require economic sacrifice Therefore it is vital reading for students academics and policy makers involved in the debate surrounding climate change *Climate Change*

Communication and the Internet Nelya Kotevko, Brigitte Nerlich, Iina Hellsten, 2019-05-16 The volume provides a timely state of the art collection of studies examining climate change communication in the era of digital media The chapters focus on a broad range of topics covering various aspects of both practice and research in climate change communication ranging from the use of online platforms to blogs and social networking sites Climate change communication has increasingly moved into Internet based forums and this volume provides a comprehensive overview of research into Internet and climate change communication The studies share valuable methodological insights in this relatively new field of research and shed light on the opportunities and challenges underlying the collection and analysis of online climate change related data This book was previously published as a special issue of Environmental Communication **Rethinking Climate Change Research**

Pernille Almlund, 2016-04-08 The problems and debates surrounding climate change possess closely intertwined social and scientific aspects This book highlights the importance of researching climate change through a multi disciplinary approach namely through cultural studies communication studies and clean technology studies These three dimensions taken together have the ability to constitute a positive agenda for climate change science in its broader understanding To cope with the climate change challenge not only do we need new energy efficient technologies other ways of living and new ways to communicate but we especially need new ways to start thinking about climate change across disciplines and backgrounds We need to begin thinking across engineering cultural science and communication in order to create innovative solutions as well as to generate optimistic and progressive narratives about the future Accentuating these softer scientific disciplines their overlaps and the positive discourses they can create this book provides some more profoundly researched themes pertaining to climate change and by that strengthening the analytical as well as the integrative approaches toward the fundamental questions at stake
