Ptolemy's Tetrabiblos Translation William Moerbeke:

Ptolemy's Tetrabiblos in the Translation of William of Moerbeke Gudrun Vuillemin-Diem, Carlos Steel, 2015-04-29
First ever edition of the Latin translation of Ptolemy's masterwork This is the first edition ever of Moerbeke's Latin translation of Ptolemy's celebrated astrological handbook known under the title Tetrabiblos or Quadripartitum opus Ptolemy's treatise composed after 141 AD offers a systematic overview of astrological science and had together with his Almagest an enormous influence up until the 17th century In the Latin Middle Ages the work was mostly known through translations from the Arabic William of Moerbeke's translation was made directly from the Greek and it is a major scholarly achievement manifesting not only Moerbeke's genius as a translator but also as a scientist The edition is accompanied by extensive Greek Latin indices which give evidence of Moerbeke's astonishing enrichment of the Latin vocabulary which he needed both to translate the technical scientific vocabulary and to cope with the many new terms Ptolemy created The introduction examines Moerbeke's translation method and situates the Latin translation within the tradition of the Greek text This edition makes possible a better assessment of the great medieval translator and also contributes to a better understanding of the Greek text of Ptolemy's masterwork
Latin Translations of Greek Texts from the 11th to the 13th Century, 2025-02-03 This volume examines the phenomenon of translation from Greek into Latin from the eleventh century to the thirteenth These translated texts prompted Western scholars to rediscover the works of classical Greek and Byzantine authors and reshape the medieval intellectual landscape Though our agenda focuses on translations of scientific texts the collection of essays here also offers the reader insights into the broader cultural social and political functions and implications of individual translations and translation more broadly as a practice Contributors are Dimitar Angelov Peter Bara Pieter Beullens Alessandra Bucossi Luigi d'Amelia Paola Degni Michael Dunne Elisabeth Fisher Brad Hostetler Estelle Ingrand Varenne Marc Lauxtermann Tamás Mészáros James Morton Teresa Shawcross and Anna Maria Urso **Astronomical Knowledge**

Transmission Through Illustrated Aratea Manuscripts Marion Dolan, 2017-08-22 This carefully researched monograph is a historical investigation of the illustrated Aratea astronomical manuscript and its many interpretations over the centuries Aratus 270 B C E Greek poem describing the constellations and astrological phenomena was translated and copied over 800 years into illuminated manuscripts that preserved and illustrated these ancient stories about the constellations The Aratea survives in its entirety due to multiple translations from Greek to Latin and even to Arabic with many illuminated versions being commissioned over the ages The survey encompasses four interrelated disciplines history of literature history of myth history of science and history of art Aratea manuscripts by their nature are a meeting place of these distinct branches and the culling of information from historical literature and from the manuscripts themselves focuses on a wider holistic view a narrow approach could not provide a proper perspective What is most essential to know about this work is that because of its successive incarnations it has survived and been reinterpreted through the centuries which speaks to its importance in all of

these disciplines This book brings a better understanding of the history changes and transmission of the original astronomical Phaenomena poem Historians art historians astronomy lovers and historians of astronomy will learn more specialized details concerning the Aratea and how the tradition survived from the Middle Ages It is a credit to the poetry of Aratus and the later interpreters of the text that its pagan aspects were not edited nor removed but respected and maintained in the exact same form despite the fact that all sixty Aratea manuscripts mentioned in this study were produced under the rule of Christianity The Friar and the Philosopher Pieter Beullens,2022-11-10 William of Moerbeke was a prolific medieval translator of Aristotle and other ancient philosophical and scientific authors from Greek into Latin and he played a decisive role in the acceptance of Aristotelian philosophy in the Latin world He is often criticized for an allegedly deficient translation method However this book argues that his approach was a deliberate attempt to allow readers to reach the correct understanding of the source texts in accordance with the medieval view of the role of the translator William's project to make all genuine works of Aristotle and also of other important authors from Antiquity available in Latin is framed against the background of intellectual life in the 13th century the deliberate policy of his Dominican order to reconcile Christian doctrine with worldly knowledge and new trends in book production that influenced the spread of the new translations William of Moerbeke's seemingly modest acts of translation started an intellectual revolution the impact of which extended from the Middle Ages into the early modern era The Friar and the Philosopher will appeal to researchers and students alike interested in Medieval perceptions of Aristotle as well as other works from Antiquity **Hellenistic Astrology** Chris Brennan,2017-02-10 Hellenistic astrology is a tradition of horoscopic astrology that was practiced in the Mediterranean region from approximately the first century BCE until the seventh century CE It is the source of many of the modern traditions of astrology that still flourish around the world today although it is only recently that many of the surviving texts of this tradition have become available again for astrologers to study Hellenistic Astrology The Study of Fate and Fortune is one of the first comprehensive surveys of this tradition in modern times The book covers the history philosophy and techniques of ancient astrology with a special focus on demonstrating how many of the fundamental concepts underlying the practice of western astrology originated during the Hellenistic period *Abraham Ibn Ezra Latinus: Henry Bate's Latin Versions of Abraham Ibn Ezra's Astrological Writings* Shlomo Sela,2022-12-05 The present volume focuses on Henry Bate of Mechelen 1246 after 1310 the first scholar to bring Ibn Ezra's astrological work to the knowledge of Latin readers The volume has two main objectives The first is to offer as complete and panoramic an account as possible of Bate's translational project Therefore this volume offers critical editions of all six of Bate's complete translations of Ibn Ezra's astrological writings The second objective is to accompany Bate's Latin translations with literal English translations and to offer a thorough collation of the Latin translation with their English translations against the Hebrew and French source texts This is volume 1 of a two volume set The Astrological Autobiography of a Medieval Philosopher Steven Vanden Broecke,Carlos

Steel, David Juste, Shlomo Sela, 2018-11-26 Critical edition of the earliest known astrological autobiography The present book reveals the riches of the earliest known astrological autobiography authored by Henry Bate of Mechelen 1246 after 1310 Exploiting all resources of contemporary astrological science Bate conducts in his *Nativitas* a profound self analysis revealing the peculiarities of his character and personality at a crucial moment of his life 1280 The result is an extraordinarily detailed and penetrating attempt to decode the fate of one's own life and its idiosyncrasies The *Astrological Autobiography of a Medieval Philosopher* offers the first critical edition of Bate's *Nativitas* An extensive introduction presents Bate's life and work and sheds new light on the reception and use of Greek Latin Arabic and Hebrew texts among scholars in Paris at the end of the 13th century The book thus provides a major new resource for scholars working on medieval science autobiography and notions of personhood and individuality

Prognostication in the Medieval World Matthias Heiduk, Klaus Herbers, Hans-Christian Lehner, 2020-11-09 Two opposing views of the future in the Middle Ages dominate recent historical scholarship According to one opinion medieval societies were expecting the near end of the world and therefore had no concept of the future According to the other opinion the expectation of the near end created a drive to change the world for the better and thus for innovation Close inspection of the history of prognostication reveals the continuous attempts and multifold methods to recognize and interpret God's will the prodigies of nature and the patterns of time That proves on the one hand the constant human uncertainty facing the contingencies of the future On the other hand it demonstrates the firm belief during the Middle Ages in a future which could be shaped and even manipulated The handbook provides the first overview of current historical research on medieval prognostication It considers the entangled influences and transmissions between Christian Jewish Islamic and non monotheistic societies during the period from a wide range of perspectives An international team of 63 renowned authors from about a dozen different academic disciplines contributed to this comprehensive overview

Dreams, Nature, and Practices as Signs of the Future in the Middle Ages Klaus Herbers, Hans-Christian Lehner, 2022-06-13 A great number of historical examples show how desperate people sought to obtain a glimpse of the future or explain certain incidents retrospectively through signs that had occurred in advance In that sense signs are always considered a portent of future events In different societies and at different times the written or unwritten rules regarding their interpretation varied although there was perhaps a common understanding of these processes This present volume collates essays from specialists in the field of prognostication in the European Middle Ages Contributors are Klaus Herbers Wolfram Brandes Zhao Lu Rolf Scheuermann Thomas Krümpel Bernardo Bertholin Kerr Gaele Bosseman Julia Eva Wannenmacher Matthias Kaup Vincent Gossaert Jürgen Gebhardt Matthias Gebauer Richard Landes

Medieval Meteorology Anne Lawrence-Mathers, 2020 Explores how scientifically based weather forecasting spread and flourished in medieval Europe from c 700 c 1600
