Debbie Felton

Punching Out One Year In A Closing Auto Plant:

Punching Out Paul Clemens,2011-01 An investigation into the 2006 closing of a once proud Detroit auto plant assesses the larger implications of American de industrialization and the resulting hardships facing the working class **The Age of Acquiescence** Steve Fraser,2015-02-17 A groundbreaking investigation of how and why from the 18th century to the present day American resistance to our ruling elites has vanished From the American Revolution through the Civil Rights movement Americans have long mobilized against political social and economic privilege Hierarchies based on inheritance wealth and political preferment were treated as obnoxious and a threat to democracy Mass movements envisioned a new world supplanting dog eat dog capitalism But over the last half century that political will and cultural imagination have vanished Why The Age of Acquiescence seeks to solve that mystery Steve Fraser s account of national transformation brilliantly examines the rise of American capitalism the visionary attempts to protect the democratic commonwealth and the great surrender to today s delusional fables of freedom and the politics of fear Effervescent and razorsharp The Age of Acquiescence is provocative and fascinating **Unfinished Business** Judith Hamera,2017 Unfinished Business argues that U S deindustrialization cannot be separated from race specifically from choreographed movements of African Americans that represent or resist normative or aberrant relationships to work and capital in transitional times *America's Assembly Line* David E. Nye,2015-01-30 From the Model T to today s lean manufacturing the assembly line as crucial yet controversial agent of social and economic transformation The mechanized assembly line was invented in 1913 and has been in continuous operation ever since It is the most familiar form of mass production Both praised as a boon to workers and condemned for exploiting them it has been celebrated and satirized We can still picture Chaplin s little tramp trying to keep up with a factory conveyor belt In America s Assembly Line David Nye examines the industrial innovation that made the United States productive and wealthy in the twentieth century The assembly line developed at the Ford Motor Company in 1913 for the mass production of Model Ts first created and then served an expanding mass market It also transformed industrial labor By 1980 Japan had reinvented the assembly line as a system of lean manufacturing American industry reluctantly adopted the new approach Nye describes this evolution and the new global landscape of increasingly automated factories with fewer industrial jobs in America and questionable working conditions in developing countries A century after Ford s pioneering innovation the assembly line continues to evolve toward more sustainable manufacturing A Cultural History of Underdevelopment John Patrick Leary,2016-11-10 A Cultural History of Underdevelopment explores the changing place of Latin America in U S culture from the mid nineteenth century to the recent U S Cuba d tente In doing so it uncovers the complex ways in which Americans have imagined the global geography of poverty and progress as the hemispheric imperialism of the nineteenth century yielded to the Cold War discourse of underdevelopment John Patrick Leary examines representations of uneven development in Latin America across a variety of genres and media from canonical fiction and

poetry to cinema photography journalism popular song travel narratives and development theory For the United States Latin America has figured variously as good neighbor and insurgent threat as its possible future and a remnant of its past By illuminating the conventional ways in which Americans have imagined their place in the hemisphere the author shows how the popular image of the United States as a modern exceptional nation has been produced by a century of encounters that travelers writers radicals filmmakers and others have had with Latin America Drawing on authors such as James Weldon Johnson Willa Cather and Ernest Hemingway Leary argues that Latin America has figured in U S culture not just as an exotic other but as the familiar reflection of the United States own regional racial class and political inequalities **Conflicted**

American Landscapes David E. Nye, 2021-04-27 How conflicting ideas of nature threaten to fracture America's identity Amber waves of grain purple mountain majesties American invest much of their national identity in sites of natural beauty And yet American lands today are torn by conflicts over science religion identity and politics Creationists believe that the Biblical flood carved landscapes less than 10 000 years ago environmentalists protest pipelines Western states argue that the federal government's land policies throttle free enterprise Native Americans demand protection for sacred sites In this book David Nye looks at Americans irreconcilably conflicting ideas about nature A landscape is conflicted when different groups have different uses for the same location for example when some want to open mining sites that others want to preserve or when suburban development impinges on agriculture Some landscapes are so degraded from careless use that they become toxic anti landscapes Nye traces these conflicts to clashing conceptions of nature ranging from pastoral to Native American to military industrial that cannot be averaged into a compromise Nye argues that today's environmental crisis is rooted in these conflicting ideas about land Depending on your politics global warming is either an inconvenient truth or fake news America's contradictory conceptions of nature are at the heart of a broken national consensus The Origins of the Urban Crisis

Thomas J. Sugrue, 2014-04-27 The reasons behind Detroit's persistent racialized poverty after World War II Once America's arsenal of democracy Detroit is now the symbol of the American urban crisis In this reappraisal of America's racial and economic inequalities Thomas Sugrue asks why Detroit and other industrial cities have become the sites of persistent racialized poverty He challenges the conventional wisdom that urban decline is the product of the social programs and racial fissures of the 1960s Weaving together the history of workplaces unions civil rights groups political organizations and real estate agencies Sugrue finds the roots of today's urban poverty in a hidden history of racial violence discrimination and deindustrialization that reshaped the American urban landscape after World War II This Princeton Classics edition includes a new preface by Sugrue discussing the lasting impact of the postwar transformation on urban America and the chronic issues leading to Detroit's bankruptcy **Landscapes of Dread in Classical Antiquity** Debbie Felton, 2018-04-27 Over the last

two decades research in cultural geography and landscape studies has influenced many humanities fields including Classics and has increasingly drawn our attention to the importance of spaces and their contexts both geographical and social how

spaces are described by language what spaces are used for by individuals and communities and how language use and the passage of time invest spaces with meaning In addition to this spatial turn in scholarship recent years have also seen an emotive turn an increased interest in the study of emotion in literature Many works on landscape in classical antiquity focus on themes such as the sacred and the pastoral and the emotions such spaces evoke such as respectively feelings of awe or tranquillity in settings both urban and rural Far less scholarship has been generated by the locus terribilis the space associated with negative emotions because of the bad things that happen there In short the recent emotive turn in humanities studies has so far largely neglected several of the more negative emotions including anxiety fear terror and dread The papers in this volume focus on those neglected negative emotions especially dread and they do so while treating many types of space including domestic suburban rural and virtual and while covering many genres and authors including the epic poems of Homer Greek tragedy Roman poetry and historiography medical writing paradoxography and the short story

The Routledge Handbook of Nostalgia Tobias Becker,Dylan Trigg,2024-08-21 The Routledge Handbook of Nostalgia serves as a guide to the complex and often contradictory concept of nostalgia as well as the field of nostalgia studies more broadly Nostalgia is an area of intense interest across several disciplines as well as within society and culture more generally This handbook brings together an international interdisciplinary team of researchers to survey the current landscape and identify common trends achievements and gaps in existing literature Comprising 45 chapters the volume covers the following topics Disciplinary perspectives of nostalgias including philosophy history literature and psychology Conceptual aspects of nostalgia including homesickness temporality affectivity and memory Historical and political dimensions such as afro nostalgia populism feminism and queer nostalgia Spatial and material aspects of nostalgia including ruins regionalism and objects Media related nostalgia such as analogue and digital nostalgia reboots revivals gaming and graphic novels Essential reading for students and researchers working in nostalgia studies this book will also be beneficial to related disciplines such as philosophy anthropology geography history and literature cultural media heritage museum and film studies courses and more generally for readers interested in how the past is represented and used in the present **Voices of Guinness** Tim Strangleman,2019-05-02 *Voices of Guinness* tells the story of work in the twentieth and early twenty first centuries through the life of one plant the former Guinness brewery at Park Royal West London It reflects on questions of the meaning of work industrial citizenship identity loss deindustrialization and change through powerful oral histories and a wealth of archival and photographic materials
