Principles, Practice and Design of Highway Engineering Sharma S.K.,2014 For B E B Tech M E M Tech Students of Civil Engineering Also for Practising Engineering and Designers Women Architects in India Mary N. Woods,2016-10-04 As the first inclusive study of how women have shaped the modern Indian built environment from the independence struggle until today this book reveals a history that is largely unknown not only in the West but also in India Educated in the 1930s and 1940s the very first women architects designed everything from factories to museums in the post independence period The generations that followed are now responsible for metro systems shopping malls corporate headquarters and IT campuses for a global India But they also design schools cultural centers religious pilgrimage hotels and wildlife sanctuaries Pioneers in conserving historic buildings these women also sustain and resurrect traditional crafts and materials empower rural and marginalized communities and create ecologically sustainable architectures for India Today although women make up a majority in India s ever increasing schools of architecture it is still not easy for them like their Western sisters to find their place in the profession Recounting the work and lives of Indian women as not only architects but also builders and clients opens a new window onto the complexities of feminism modernism and design practice in India and beyond Set in the design centers of Mumbai and Delhi this book is also one of the first histories of architectural education and practice in two very different cities that are now global centers The diversity of practices represented here helps us to imagine other ways to create and build apart from starchitecture And how these women negotiate tradition and modernity at work and at home is crucial for

understanding gender and modern architecture in a more global and less Eurocentric context In a country where female emancipation was important for narratives of the independence movement and the new nation state feminism was nonetheless eschewed as divisive and damaging to the nationalist cause Class caste tradition and family restricted but also created opportunities for the very first women architects in India just as they do now for the growing number of young women professionals today
