Qing Colonial Enterprise Ethnography And Cartography In Early Modern China:

Qing Colonial Enterprise Laura Hostetler, 2005-12-15 In *Qing Colonial Enterprise* Laura Hostetler shows how Qing China 1636-1911 used cartography and ethnography to pursue its imperial ambitions. She argues that far from being on the periphery of developments in the early modern period, Qing China both participated in and helped shape the new emphasis on empirical scientific knowledge that was simultaneously transforming Europe and its colonial empires at the time. Although mapping in China is almost as old as Chinese civilization itself, the Qing insistence on accurate to-scale maps of their territory was a new response to the difficulties of administering a vast and growing empire. Likewise, direct observation became increasingly important to Qing ethnographic writings such as the illustrated manuscripts known as Miao albums, from which twenty color paintings are reproduced in this book. These were intended to educate Qing officials about various non-Han peoples so that they could govern these groups more effectively. Hostetler's groundbreaking account will interest anyone studying the history of the early modern period and colonialism.

Science In China, 1600-1900: Essays By Benjamin A Elman Benjamin A Elman, 2015-05-07 Distinguished historian Benjamin A Elman's collective volume on the history of science in imperial China brings together over 30 years of historical literature on the subject. With updates to the literature and new material including transcripts of podcasts and translated interview articles, *Science in China* takes the reader on a journey starting in the early 17th century with the missionary efforts of the Jesuits in China and ending with the Protestant missions in the 19th century. These two milestone encounters brought Western sciences to local Chinese scholars with great success in shaping modern Chinese science. Elman studies the interaction between Western and Chinese sciences through philological research and evidence and treats the two encounters not as separate events but as a continuum of creative exchange of scientific knowledge and discourse.

Space, Politics, and Cultural Representation in Modern China Enhua Zhang, 2016-12-08 Regarding revolution as a spatial practice, this book explores modes of spatial construction in modern China through a panoramic overview of major Chinese revolutionary events and nuanced analysis of cultural representations. Examining the relationship between revolution, space, and culture in modern China, the author takes five spatially significant revolutionary events as case studies: the territorial dispute between Russia and the Qing dynasty in 1892, the Land Reform in the 1920s, the Long March 1934-36, the mainland-Taiwan split in 1949, and the Cultural Revolution 1966-76, and analyses how revolution constructs, conceives, and transforms space. Using materials associated with these events, including primarily literature as well as maps, political treatises, historiography, plays, film, and art, the book argues that in addition to redirecting the flow of Chinese history, revolutionary movements operate in and on space in three main ways: maintaining territorial sovereignty, redefining social relations, and governing an imaginary realm. Arguing for reconsideration of revolution as a reorganization of space as much as time, this book will appeal to students and scholars of Chinese culture, society, history, and literature.

The Eastern Land and the Western Heaven Fan Zhang, 2023-12-22 This book sheds light on the structure of a

unity with diversity developed in the Qing imperial formation 1636-1912 by a case study of the Qing-Tibetan encounters in the eighteenth century. By analyzing historical and ethnographical materials, the book investigates the translation of Chinese histories and stone inscriptions into Tibetan, the transformation of the landscapes at Mount Wutai and Lhasa, and the transplantation of Chinese deities and medical practices to Tibet. It demonstrates the processes in which the cosmopolitan interlocutors reified imperial integrity while expressing their diverse longings and belongings. It concludes that the Qing's rule over its cultural others was neither simply Sinicizing nor colonizing but a translational process in which multivocalic actors shared narratives, landscapes, and practices while the emperor and tantric masters performed cosmic power over humans and metahumans. This book cuts across the fields of anthropology, history, Chinese Studies, and Tibetan Studies. It reflects on the concepts of sovereignty and ethnicity and it also extends the methodological horizon of historical anthropology.

Making the New World Their Own Qiong Zhang, 2015-05-26. In *Making the New World Their Own*, Qiong Zhang offers a systematic study of how Chinese scholars in the late Ming and early Qing came to understand that the earth is shaped as a globe. This notion arose from their encounters with Matteo Ricci, Giulio Aleni, and other Jesuits. These encounters formed a fascinating chapter in the early modern global integration of space. It unfolded as a series of mutually constitutive and competing scholarly discourses that reverberated in fields from cosmology, cartography, and world geography to classical studies. Zhang demonstrates how scholars such as Xiong Mingyu, Fang Yizhi, Jie Xuan, Gu Yanwu, and Hu Wei appropriated Jesuit ideas to rediscover China's place in the world and reconstitute their classical tradition. Winner of the Chinese

Historians in the United States CHUS 2015 Academic Excellence Award. **The Invention of China** Bill Hayton, 2020-10-02. A smart take on modern Chinese nationalism. *Foreign Policy*: this provocative account shows that China and its 5,000 years of unified history is a national myth created only a century ago with a political agenda that persists to this day. China's current leadership lays claim to a 5,000-year-old civilization, but China as a unified country and people, Bill Hayton argues, was created far more recently by a small group of intellectuals. In this compelling account, Hayton shows how China's present-day geopolitical problems, the fates of Hong Kong, Taiwan, Tibet, Xinjiang, and the South China Sea were born in the struggle to create a modern nation-state. In the late nineteenth and early twentieth centuries, reformers and revolutionaries adopted foreign ideas to invent a new vision of China. By asserting a particular politicized version of the past, the government bolstered its claim to a vast territory stretching from the Pacific to Central Asia. Ranging across history, nationhood, language, and territory, Hayton shows how the Republic's reworking of its past not only helped it to justify its right to rule a century ago but continues to motivate and direct policy today. **China** Robert B. Marks, 2017-02-13. This deeply informed and clearly written text provides a comprehensive and comprehensible history of China from prehistory to the present. Now updated to include recent political events and scientific research, the book focuses on the interaction of humans and their environment. Tracing changes in the physical and cultural world that is home to a fifth of humankind, Robert B. Marks illuminates the

paradoxes inherent in China's environmental narrative demonstrating how historically sustainable practices can in fact be profoundly ecologically unsound. The author also reevaluates China's traditional heroic storyline highlighting the marginalization of nature and contacts with other peoples that followed the spread of Chinese civilization while examining the development of a distinctly Chinese way of relating to and altering the environment. Unmatched in his ability to synthesize a complex subject clearly and cogently, Marks has written an accessible yet nuanced history for any student interested in China's past or present or indeed in the world's environmental future.

Mapping Europe's Borderlands Steven Seegel, 2012-05-14. The simplest purpose of a map is a rational one: to educate, to solve a problem, to point someone in the right direction. Maps shape and communicate information for the sake of improved orientation. But maps exist for states as well as individuals and they need to be interpreted as expressions of power and knowledge, as Steven Seegel makes clear in his impressive and important new book. *Mapping Europe's Borderlands* takes the familiar problems of state and nation building in eastern Europe and presents them through an entirely new prism: that of cartography and cartographers. Drawing from sources in eleven languages including military, historical, pedagogical, and ethnographic maps as well as geographic texts and related cartographic literature, Seegel explores the role of maps and mapmakers in the East-Central European borderlands from the Enlightenment to the Treaty of Versailles. For example, Seegel explains how Russia used cartography in the aftermath of the Napoleonic Wars and later formed its geography society as a cover for gathering intelligence. He also explains the importance of maps to the formation of identities and institutions in Poland, Ukraine, and Lithuania as well as in Russia. Seegel concludes with a consideration of the impact of cartographers' regional and socioeconomic backgrounds, educations, families, career options, and available language choices.

Historical Dictionary of Modern China (1800-1949)

James Z. Gao, 2009-06-16. The *Historical Dictionary of Modern China 1800-1949* offers a concise but comprehensive examination of the political, military, economic, social, and cultural development of modern China. Instead of focusing merely on the political elites of China, this reference covers a variety of significant persons, including women and ethnic minorities, new historical concepts, cultural and educational institutions, and economic activities. Drawing on newly available records, including a large mass of governmental and family archives, the narratives presented reveal new facts, offer a new interpretation in accordance with China's modernization process during the late Qing period, and a revisionist perspective on the Republican history. The chronology records not only political and military events but also other experiences of the Chinese people. The bibliography gives prominence to current literature on China's drive towards modernization, and appendixes provide the reader with detailed information on China's cultural and economic transformation.

Buddhism Between Tibet and China Matthew Kapstein, 2014-05-01. Exploring the long history of cultural exchange between the Roof of the World and the Middle Kingdom, *Buddhism Between Tibet and China* features a collection of noteworthy essays that probe the nature of their relationship spanning from the Tang Dynasty (618-907 CE) to the present day.

Annotated and contextualized by noted scholar Matthew Kapstein and others the historical accounts that comprise this volume display the rich dialogue between Tibet and China in the areas of scholarship the fine arts politics philosophy and religion This thoughtful book provides insight into the surprisingly complex history behind the relationship from a variety of geographical regions Includes contributions from Rob Linrothe Karl Debreczeny Elliot Sperling Paul Nietupski Carmen Meinert Gray Tuttle Zhihua Yao Ester Bianchi Fabienne Jagou Abraham Zablocki and Matthew Kapstein
