Reviving British Manufacturing Why What How:

Reviving British Manufacturing Alan Reece, 2011 Manufacturer Alan Reece argues for a revival of British manufacturing industry to reduce Britain's reliance on financial services The Silk Industry of Great Britain and Its Revival James Salter-Whiter, 1882

Business in Britain in the Twentieth Century Richard Coopey, Peter Lyth, 2009-08-13 This collection of fresh incisive scholarship by some of the leading business historians critically examines the nature of economic recovery in Britain in recent years Covering the key issues for business history in this period the book confronts the traditional literature on conclusions of relative decline and monocausal simplistic explanations It provides an impressive range of studies forming a platform for a new debate on the nature of British business in the 20th century Themes include productivity management research and development marketing regional clusters and networks industrial policy the use of technology and gender Sector studies include newer post war hopefuls and successes including aerospace IT retail banking overseas investment the creative industries The book demonstrates that our understanding of the historic strengths and weaknesses of business in Britain and the shifting balance between sectors of the economy has until now been poorly understood and that British business history needs a fundamental reappraisal *Postwar Politics, Society and the Folk Revival in England, 1945-65* Julia Mitchell, 2019-09-19 The English folk revival cannot be understood when divorced from the history of post war England yet the existing scholarship fails to fully engage with its role in the social and political fabric of the nation *Postwar Politics Society and the Folk Revival in England* is the first study to interweave the story of a gentrifying folk revival with the socio political tensions inherent in England's postwar transition from austerity to affluence Julia Mitchell skillfully situates the English folk revival in the context of the rise of the new left the decline of heavy industry the rise of local regional and national identities the Americanisation of English culture and the development of mass culture In doing so she demonstrates that the success of the English folk revival derived from its sense of authenticity and its engagement with topical social and political issues such as the conflicted legacy of the Welfare State the fight for nuclear disarmament and the fallout of nationalization In addition she shrewdly compares the US and British revival to identify the links but also what was distinctive about the movement in Britain Drawing on primary sources from folk archives the BBC the music press and interviews with participants this is a theoretically engaged and sophisticated analysis of how postwar culture shaped the folk revival in England Protectionism and Economic Revival Michael Kitson, Solomos Solomou, 1990-09-28 The impact of protectionism is a contentious policy issue This book evaluates the effects of protectionism on the British inter war economy and argues that trade policies should be constructed in the context of prevailing economic conditions not solely with reference to theoretical perspectives

That Should Still Be Us Martin Sieff, 2012-03-08 Chronicles the damage Thomas Friedman's flat wrong Flat Earth ideas have caused to the American economy As Martin Sieff convincingly argues Thomas Friedman's prescriptions have played a major role in causing America's economic decline yet many executives and politicians

including President Obama still look to him as their guru Sieff exposes Friedman fallacies on the nature of globalization the information technology revolution political paralysis in Washington and energy consumption He documents how China is investing far more in locking up the world's oil and gas reserves than in developing the ineffective green technologies Friedman claims they love He exposes Friedman's most acclaimed ideas as retreads of naïve fantasies widely believed and exposed as useless a century ago Convincingly refutes Thomas Friedman's fantasies and many fallacies in his best selling books *The World Is Flat* and *That Used to Be Us* and presents a radically different vision and road map for America's economy and its future Offers a practical trade and energy strategy to restore American prosperity and industrial strength in the twenty first century Explains why America's economy will soon depend on producing low carbon footprint natural gas reviving its manufacturing sector and protecting its industry from unfair foreign competition and artificially manipulated exchange rates Written by veteran journalist Martin Sieff a regular contributor to FoxNews.com and Chief Global Analyst at The Globalist Research Center
