Retracing The Expanded Field Encounters Between Art And Architecture:

Retracing the Expanded Field Spyros Papapetros, Julian Rose, 2014-10-24 Scholars and artists revisit a hugely influential essay by Rosalind Krauss and map the interactions between art and architecture over the last thirty five years Expansion convergence adjacency projection rapport and intersection are a few of the terms used to redraw the boundaries between art and architecture during the last thirty five years If modernists invented the model of an ostensible synthesis of the arts their postmodern progeny promoted the semblance of pluralist fusion In 1979 reacting against contemporary art s transformation of modernist medium specificity into postmodernist medium multiplicity the art historian Rosalind Krauss published an essay *Sculpture in the Expanded Field* that laid out in a precise diagram the structural parameters of sculpture architecture and landscape art Krauss tried to clarify what these art practices were what they were not and what they could become if logically combined The essay soon assumed a canonical status and affected subsequent developments in all three fields *Retracing the Expanded Field* revisits Krauss s hugely influential text and maps the ensuing interactions between art and architecture Responding to Krauss and revisiting the milieu from which her text emerged artists architects and art historians of different generations offer their perspectives on the legacy of *Sculpture in the Expanded Field* Krauss herself takes part in a roundtable discussion moderated by Hal Foster A selection of historical documents including Krauss s essay presented as it appeared in *October* accompany the main text Neither eulogy nor hagiography *Retracing the Expanded Field* documents the groundbreaking nature of Krauss s authoritative text and reveals the complex interchanges between art and architecture that increasingly shape both fields Contributors Stan Allen George Baker Yve Alain Bois Benjamin Buchloh Beatriz Colomina Penelope Curtis Sam Durant Edward Eigen Kurt W Forster Hal Foster Kenneth Frampton Branden W Joseph Rosalind Krauss Miwon Kwon Sylvia Lavin Sandro Marpillero Josiah McElheny Eve Meltzer Michael Meredith Mary Miss Sarah Oppenheimer Matthew Ritchie Julia Robinson Joe Scanlan Emily Eliza Scott Irene Small Philip Ursprung Anthony Vidler **The Sculptural in the (Post-)Digital Age** Mara-Johanna Kölmel, Ursula Ströbele, 2023-06-19 Digital technologies have profoundly impacted the arts and expanded the field of sculpture since the 1950s Art history however continues to pay little attention to sculptural works that are conceived and materialized using digital technologies How can we rethink the artistic medium in relation to our technological present and its historical precursors A number of theoretical approaches discuss the implications of the so called Aesthetics of the Digital referring above all to screen based phenomena For the first time this publication brings together international and trans historical research perspectives to explore how digital technologies re configure the understanding of sculpture and the sculptural leading into the post digital age Up to date research on digital technologies expansion of the concept of sculpture Linking historical sculptural debates with discourse on the new media and post digital culture *Is Architecture Art?* John Macarthur, 2024-10-31 Is architecture an art like literature or music Or is it more akin to science or engineering Can buildings be artworks just like paintings and sculptures or does their fundamentally

functional nature mean they cannot be considered pure works of art Questions of architecture art and aesthetics do not allow for simple answers But by asking such questions we can usefully reveal the ways in which the concepts and meanings of architecture have changed over the centuries and how they continue to change in the contemporary era Is Architecture Art explores the key conceptual questions about the aesthetic appreciation of architecture and its persistently contested status as an artform It engages the work of thinkers ranging from Hume and Kant to Adorno Tafuri and Rancière and draws on accessible and thought provoking accounts of historical and contemporary architectural and art theory Taking novel approaches to issues that will be familiar to the practising architect it shows how aesthetics and art theory can open up and illuminate architectural theory issue by issue Is Architecture Art will provoke discussion and debate among architects and architectural theorists and force a new understanding of the purpose of architectural practice in the contemporary era as the concepts of art the arts and of the creative economy have shifted and blurred as never before The Arts of the Grid Liora Bigon, Nava Shaked, 2021-10-04 This is the first collection of interdisciplinary scholarship to expand on gridded modalities with a strong affinity to the arts It seeks to inspire new avenues of research by exploring a horizon of gridded relationships among humans between humans and the environment and between human and non human actors By bringing together philosophical themes and applied practices the volume traces a genealogy of the grid as an exercise in grasping its inherent complexity and incomplete quality A collective effort by a group of researchers practitioners and designers it promotes an understanding of gridded modalities as complex networks that interact with other networks generating new meanings and reflecting changes in thought *The Insubordination of Photography* Ángeles Donoso Macaya, 2023-01-24 The Insubordination of Photography is the first book to analyze how various collectives organizations and independent media used photography to expose and protest the crimes of Chilean dictator Augusto Pinochet's regime Featuring never before seen photos and other archival material this book reflects on the integral role of images in public memory and issues of reparation and justice **Expanded Painting** Mark Titmarsh, 2017-08-24 The relevance of painting has been questioned many times over the last century by the arrival of photography installation art and digital technologies But rather than accept the death of painting Mark Titmarsh traces a paradoxical interface between this art form and its opposing forces to define a new practice known as expanded painting giving the term historical context theoretical structure and an important place in contemporary practice As the formal boundaries tumble the being of painting expands to become a kind of total art incorporating all other media including sculpture video and performance Painting is considered from three different perspectives ethnology art theory and ontology From an ethnological point of view painting is one of any number of activities that takes place within a culture In art theory terms painting is understood to produce objects of interest for humanities disciplines Yet painting as a medium often challenges both its object and image status expanding and creating hybrid works between painting objects screen media and text Ontologically painting is understood as an object of aesthetic discourse that

in turn reflects historical states of being Thus Expanded Painting delivers a new kind of saying a post aesthetic discourse that is attuned to an uncanny tension between the presence and absence of painting Art, Design and Capital since the 1980s Bill Roberts,2019-08-02 This book examines artists engagements with design and architecture since the 1980s and asks what they reveal about contemporary capitalist production and social life Setting recent practices in historical relief and exploring the work of Dan Graham Rita McBride Tobias Rehberger and Liam Gillick Bill Roberts argues that design is a singularly valuable lens through which artists evoke trace and critique the forces and relations of production that underpin everyday experience in advanced capitalist economies American Artists Engage the Built Environment, 1960-1979 Susanneh Bieber,2023-07-31 This volume reframes the development of US American avant garde art of the long 1960s from minimal and pop art to land art conceptual art site specific practices and feminist art in the context of contemporary architectural discourses Susanneh Bieber analyzes the work of seven major artists Donald Judd Robert Grosvenor Claes Oldenburg Robert Smithson Lawrence Weiner Gordon Matta Clark and Mary Miss who were closely associated with the formal aesthetic innovations of the period While these individual artists came to represent diverse movements Bieber argues that all of them were attracted to the field of architecture the work of architects engineers preservationists landscape designers and urban planners because they believed these practices more directly shaped the social and material spaces of everyday life This book s contribution to the field of art history is thus twofold First it shows that the avant garde of the long 1960s did not simply develop according to an internal logic of art but also as part of broader sociocultural discourses about buildings and cities Second it exemplifies a methodological synthesis between social art history and poststructural formalism that is foundational to understanding the role of art in the construction of a more just and egalitarian society The book will be of interest to scholars working in art history architecture urbanism and environmental humanism **Architecture and Ugliness** Wouter Van Acker,Thomas Mical,2020-01-09 Whatever ugliness is it remains a problematic category in architectural aesthetics alternately vilified and appropriated used either to shock or to invert conventions of architecture This book presents sixteen new scholarly essays which rethink ugliness in recent architecture from Brutalism to eclectic postmodern architectural productions and together offer a diverse reappraisal of the history and theory of postmodern architecture and design The essays address both broad theoretical questions on ugliness and postmodern aesthetics as well as more specific analyses of significant architectural examples dating from the last decades of the twentieth century The book attends to the diverse relations between the aesthetic register of ugliness and closely connected aesthetic concepts such as the monstrous the ordinary disgust the excessive the grotesque the interesting the impure and the sublime This volume does not simply document the history of a postmodern anti aesthetic through case studies Instead it aims to shed light on aesthetic problems that have been largely overlooked in the agenda of architectural theory This book answers in detail the questions How did postmodern architects appropriate troublesome contradictions bound to the raw ugliness of the real How have the ugly and

the antiaesthetic been a productive force in postmodern architecture How can ugliness be of value to architecture And how can architecture make good use of ugliness *Robert Rauschenberg's »Erased de Kooning Drawing« (1953)* Gregor Stemmrich, 2023-01-01 Erased de Kooning Drawing ist ein Kunstwerk das auf radikale Weise die Definition von Kunst und das Verständnis von Autorschaft herausfordert Drei amerikanische Künstler waren 1953 an seiner Erschaffung beteiligt Robert Rauschenberg radierte eine Zeichnung Willem de Koonings aus der mit einem gewissen Widerwillen sein Einverständnis gegeben hatte Jasper Johns versah es anschließend seiner ersten Präsentation mit einem Label das maßgeblich zu seiner Wahrnehmung als eigenständigem Werk beitrug Das zu etwas Neuem transformierte Blatt wurde in den 1950er Jahren als Neo Dada aufgefasst in den 1960ern als Beginn der Konzeptkunst und in den 1980er Jahren als Aufbruch in die Postmoderne Zahlreiche Künstlerinnen bezogen sich auf das Werk und Rauschenberg selbst griff es immer wieder auf Es erwies sich als Testfall für Bestimmungen von Modernismus Literalismus und Postmodernismus Gregor Stemmrichs kenntnisreiche kunsttheoretische Betrachtung arbeitet die anhaltende Relevanz des Werks für die Theorie des Bildes des Index der Spur des Allegorischen und der Frage nach Appropriation heraus
