Mumbai Fables Gyan Prakash, 2010-10-10 Starting from the catastrophic floods and terrorist attacks of recent years Prakash reaches back to the sixteenth century Portuguese conquest to reveal the stories behind Mumbai's historic journey Examining Mumbai's role as a symbol of opportunity and reinvention he looks at its nineteenth century development under British rule and its twentieth century emergence as a fabled city on the sea Different layers of urban experience come to light as he recounts the narratives of the Nanavati murder trial and the rise and fall of the tabloid Blitz and Mumbai's transformation from the red city of trade unions and communists into the saffron city of Hindu nationalist Shiv Sena Starry-eyed planners and elite visionaries cynical leaders and violent politicians of the street land sharks and underworld dons jostle with ordinary citizens and poor immigrants as the city copes with the dashed dreams of postcolonial urban life and lurches into the seductions of globalization

Practicing Utopia Rosemary Wakeman, 2016-04 Rosemary Wakeman provides a sweeping history of new towns those created by fiat rather than out of geographic or economic logic and often intended to break with the tendencies of past development Heralded throughout the twentieth century as solutions to congestion environmental threats architectural malaise and cultural anomie today they are often seen as sad pernicious or merely suburban Wakeman shows that hundreds of such towns sprang from templates and designs not only in North America and across Europe but around the world revealing how different cultures dreamed of reorganizing themselves Wakeman also illuminates the missteps and unanticipated results of the initial optimistic choices and impulses

Cities Beyond Borders Nicolas Kenny, Rebecca Madgin, 2016-05-23 Drawing on a body of research covering primarily Europe and the Americas but stretching also to Asia and Africa from the mid eighteenth century to the present this book explores the methodological and heuristic implications of studying cities in relation to one another Moving fluidly between comparative and transnational methods as well as across regional and national lines the contributors to this volume demonstrate the necessity of this broader view in assessing not just the fundamentals of urban life the way cities are occupied and organised on a daily basis but also the urban mindscape the way cities are imagined and represented In doing so the volume provides valuable insights into the advantages and limitations of using multiple cities to form historical inquiries

How the World Breaks Stan Cox, Paul Cox, 2016-07-12 We've always lived on a dangerous planet but its disasters aren't what they used to be How the World Breaks gives us a breathtaking new view of crisis and recovery on the unstable landscapes of the Earth's hazard zones

Father and son authors Stan and Paul Cox take us to the explosive fire fronts of overheated Australia the future lost city of Miami the fights over whether and how to fortify New York City in the wake of Sandy the Indonesian mud volcano triggered by natural gas drilling and other communities that are reimagining their lives after quakes superstorms tornadoes and landslides In the very decade when we should be rushing to heal the atmosphere and address the enormous inequalities of risk a strange idea has taken hold of global disaster policy resilience Its proponents say that threatened communities must simply learn the art of resilience adapt to risk and thereby survive This doctrine obscures the human hand in creating disasters and requires the planet s most beleaguered people to absorb the rush of floodwaters and the crush of landslides freeing the world economy to go on undisturbed The Coxes great contribution is to pull the disaster debate out of the realm of theory and into the muck and ash of the world s broken places There we learn that change is more than mere adaptation and life is more than mere survival Ultimately *How the World Breaks* reveals why unless we address the social ecological and economic roots of disaster millions more people every year will find themselves spiraling into misery It is essential reading for our time

Urbanisation, Citizenship and Conflict in India Tommaso Bobbio, 2015-06-19 Urbanisation is rapidly changing the geographic and social landscape of India and indeed Asia as a whole Issues of collective violence urban poverty and discrimination become crucial factors in the redefinition of citizenship not only in legal terms but also in a cultural and socio economic dimension While Indian cities are becoming the centres of a culture of exclusion against vulnerable social groups a long term perspective is essential to understand the patterns that shaped the space politics economy and culture of contemporary metropolises This book takes a critical longer term view of India s economic transition The idea that urban growth goes hand in hand with the modernisation of the country does not account for the fact that increasingly higher portions of the urban population are comprised of lower income groups casual labourers and slum dwellers Using the case study of Ahmedabad this book investigates the history of city and of its people over the twentieth century It analyses the contrasting relationship between urban authorities and the inhabitants of Ahmedabad and examines instances of antagonism and negotiation amongst people groups and between the people and the public authority that have continuously shaped transformed and redefined life in the city This book offers an important tool for understanding the bigger context of the conflicts the social and cultural issues that accompanied the broader process of urbanisation in contemporary India It will be of interest to scholars of Urban History studies of collective violence and South Asian Studies
