Multimedia Transport And Teleservices Multimedia Transport And Teleservices:

Multimedia Transport and Teleservices David Hutchison, Andre Danthine, Helmut Leopold, Geoff Coulson, 1994-11-04 This volume presents the proceedings of the International COST 237 Workshop held in Vienna in November 1994 in the framework of the CEC COST 237 Multimedia Telecommunications Services Projects The 24 papers presented in revised version were selected from 46 submissions they are organized in sections on teleservices multimedia mail archiving and retrieving teleservice support quality of service and synchronization multipeer communication broadband network transport issues and variable bit rate video coding transport

Multimedia: Advanced Teleservices and High-Speed

Communication Architectures Ralf Steinmetz, 1994-09-21 This volume contains the proceedings of the Second International Workshop on Advanced Teleservices and High Speed Communication Architectures IWACA 94 held in Heidelberg Germany in September 1994 The IWACA Workshop is a platform for the exchange among researchers and developers from both the multimedia applications and the high speed telecommunication communities The book presents revised versions of the 36 papers accepted for presentation at the workshop They cover several aspects of multimedia applications and asynchronous transfer mode ATM and focus on ATM LANs and ATM for the wide area high performance network of the future

European Optical Communications and Networks, 1994 Multimedia Applications, Services and Techniques - ECMAST'98 David Hutchinson, Ralf Schäfer, 1998-05-18 This book constitutes the refereed proceedings of the Third European Conference on Multimedia Applications Services and Techniques ECMAST 98 held in Berlin Germany in May 1998 The 40 revised full papers presented were carefully selected for inclusion in the book by the program committee The topics covered include multimedia networks and protocols coded representation of images sound and data multimedia delivery on broadcast and telecom networks servers and storage architectures advanced multimedia terminals and in house networks multimedia services Internet and multimedia scenario and multimedia trials

High-Performance Networks for Multimedia Applications Andre Danthine, Otto Spaniol, Wolfgang Effelsberg, Domenico Ferrari, 2012-12-06 High Performance Networks for Multimedia Applications presents the latest research on the services and protocols for networks providing the communication support for distributed multimedia applications The need for end to end QoS for these multimedia applications is raising the stakes for a powerful shaping and scheduling in the network adapter It is also creating a need for new services at the ATM layer CBR and VBR being augmented by UBR ABR and GFR which have to be evaluated in the TCP IP environment of today and tomorrow With the pressure of all the new technologies available today the backbone architecture needs to be revisited and the success of the TCP IP must not eliminate the possibility of adding a native ATM access to it Most of the research in communication services such as IntServ DiffServ and Native ATM is driven by the requirements of multimedia systems and this book illustrates the new emphasis by bringing telecommunication and computer communication experts together with application designers This is particularly true for the security issues also addressed

here Last but not least modeling techniques and mathematical models are essential to assess the performance of the networks to be built and to evaluate next century scenarios unachievable by a simple scaling of today's solutions

High Performance Networks for Multimedia Applications is a collection of high quality research papers and the in depth treatment of the subjects provides interesting and innovative solutions It is an essential reference for telecommunication and computer experts and QoS based application designers It is also a comprehensive text for graduate students in high performance networks and multimedia applications

Multimedia, Telecommunications, and Applications Giorgio Ventre, Jordi Domingo-Pascual, Andre Danthine, 1996-11-19 This book constitutes the refereed proceedings of the Third International COST 237 Workshop held in Barcelona Spain in November 1996 The 15 revised full papers presented in the volume were carefully selected from a total of 34 submissions by COST project participants as well as from outside The papers are organized in sections on multipoint and group communication quality of service applications and teleservices multimedia protocols and platforms and performance studies

Interactive Distributed Multimedia Systems Doug Shepherd, Joe Finney, Laurent Mathy, Nicholas Race, 2003-06-30 We are very happy to present the proceedings of the 8 International Workshop on Interactive Distributed Multimedia Systems IDMS 2001 in co operation with ACM SIGCOMM and SIGMM These proceedings contain the technical programme for IDMS 2001 held September 4-7 2001 in Lancaster UK For the technical programme this year we received 48 research papers from both academic and industrial institutions all around the world After the review process 15 were accepted as full papers for publication and a further 8 as short positional papers intended to provoke debate The technical programme was complimented by three invited papers QoS for Multimedia What's Going to Make It Pay by Derek McAuley Enabling the Internet to Provide Multimedia Services by Markus Hermann and MPEG-21 Standard Why an Open Multimedia Framework by Fernando Pereira The organisers are very grateful for the help they received to make IDMS 2001 a successful event In particular we would like to thank the PC for their first class views of papers particularly considering the tight reviewing deadlines this year Also we would like to acknowledge the support from Agilent BTEchnologies Hewlett Packard Microsoft Research Orange and Sony Electronics without whom IDMS 2001 would not have been such a memorable event We hope that readers will find these proceedings helpful in their future research and that IDMS will continue to be an active forum for the discussion of distributed multimedia research for years to come

Multimedia Information Storage and Management Soon M. Chung, 1996-08-31 Multimedia information systems are quite different from traditional information systems especially in data types modeling delivery and user interface The large size of multimedia data and the high bandwidth requirement of multimedia streams require new storage buffering delivery and networking schemes The presentational nature of multimedia applications requires a proper synchronization between multimedia streams and the composition of multimedia documents in the distributed environment should overcome the heterogeneity of underlying systems This book is edited for undergraduate and graduate students studying multimedia

information and applications researchers and developers of various multimedia software and hardware systems multimedia tool developers user interface designers and network protocol designers by including 17 chapters focused on the following major issues Disk scheduling and storage hierarchy Configuration of multimedia servers and buffer management Delivery scheduling for multimedia streams Supporting user interactions Document modeling and temporal modeling of multimedia data Integrated multimedia information system
