Supply Chain Management with SAP APOTM Jörg Thomas Dickersbach, 2009-06-18 The Advanced Planner and Optimiser SAP APOTM is the software from SAP dedicated to supply chain management This book provides an overview about the supported SCM

processes and explains how to implement SAP APOTM in a company. It is written from a long years experience in implementation projects and aims to provide project managers and team members with the necessary know how for a successful implementation project. The focus of the book lies in introducing modelling approaches and explaining the structure and interdependencies of systems modules and entities of SAP APOTM based on the release SAP SCMTM 2008. Another concern is the integration with SAP ERPTM both technically and from a process point of view. Since SAP APOTM projects differ significantly from other SAP projects some key issues and common mistakes concerning project management are mentioned as well.

Implementing Effective Travel Demand Management Measures, 1993. Travel Demand Management (TDM) describes a wide range of actions that are geared toward improving the efficiency of travel demand. There is much controversy and speculation as to the strength, role and validity of TDM solutions. This uncertainty has probably led to misunderstandings of the role and potential of TDM and therefore a lower yield from TDM approaches than appears to be possible. This report is the main product of a study that was sponsored by the Federal Highway Administration to try to set the facts straight and provide the most comprehensive, accurate and useable guidance on TDM. The report provides a set of materials, statistics, guides and tools that should be of significant value in not only increasing the basic understanding of what TDM is but on how to design and evaluate programs which will deliver the optimal that these strategies can offer.
