Compound Semiconductors Ferdinand Scholz, 2017-10-06 This book provides an overview of compound semiconductor materials and their technology After presenting a theoretical background it describes the relevant material preparation technologies for bulk and thin layer epitaxial growth It then briefly discusses the electrical optical and structural properties of semiconductors complemented by a description of the most popular characterization tools before more complex hetero and low dimensional structures are discussed A special chapter is devoted to GaN and related materials owing to their huge importance in modern optoelectronic and electronic devices on the one hand and their particular properties compared to other compound semiconductors on the other In the last part of the book the physics and functionality of optoelectronic and electronic device structures LEDs laser diodes solar cells field effect and heterojunction bipolar transistors are discussed on the basis of the specific properties of compound semiconductors presented in the preceding chapters of the book Compound semiconductors form the back bone of all opto electronic and electronic devices besides the classical Si electronics Currently the most important field is solid state lighting with highly efficient LEDs emitting visible light Also laser diodes of all wavelength ranges between mid infrared and near ultraviolet have been the

enabler for a huge number of unprecedented applications like CDs and DVDs for entertainment and data storage not to speak about the internet which would be impossible without optical data communications with infrared laser diodes as key elements This book provides a concise overview over this class of materials including the most important technological aspects for their fabrication and characterisation also covering the most relevant devices based on compound semiconductors It presents therefore an excellent introduction into this subject not only for students but also for engineers and scientist who intend to put their focus on this field of science
