Sea Sick Alanna Mitchell, 2009 All life whether on land or in the sea depends on the oceans for two things Oxygen Most of Earth's oxygen is produced by phytoplankton in the sea These humble one celled organisms rather than the spectacular rain forests are the true lungs of the planet Climate control Our climate is regulated by the ocean's currents winds and water cycle activity Seasick is the first book to examine the current state of the world's oceans the great unexamined ecological crisis of the planet and the fact that we are altering everything about them temperature salinity acidity ice cover volume circulation and of course the life within them Alanna Mitchell joins the crews of leading scientists in nine of the global ocean's hotspots to see firsthand what is really happening around the world Whether it's the impact of coral reef bleaching the puzzle of the oxygen less dead zones such as the one in the Gulf of Mexico or the shocking implications of the changing Ph balance of the sea Mitchell explains the science behind the story to create an engaging accessible yet authoritative account

Buitengewoon bewustzijn Peter Godfrey Smith, 2020-07-09 Een duik in de fascinerende belevingswereld van de octopus en het ontstaan van het bewustzijn Fascinerend boek Robbert Dijkgraaf Het bewustzijn wordt vaak gezien als iets waarmee de mens zich onderscheidt van dieren Onze intelligentie en ons denkvermogen hebben de mens boven aan de evolutionaire ladder geplaatst en in de zoektocht naar intelligent leven richten we onze blik stevast naar de sterren Maar volgens wetenschapsfilosoof Peter Godfrey Smith moeten we dit veel dichterbij huis zoeken bij de octopus Octopussen hebben net als de mens een groot zenuwstelsel en vertonen complex gedrag dat

misschien nog wel complexer is dan het onze Sterker nog de acht tentakels van een octopus leiden een volkomen eigen leven ze proeven voelen en bewegen uit zichzelf In Buitengewoon bewustzijn gaat wetenschapsfilosoof en diepzeeduiker Peter Godfrey Smith in op de vraag hoe de natuur zich bewust is geworden van zichzelf Zijn zoektocht naar het prille begin van het bewustzijn leidde hem naar de koppotigen en de evolutie van een eigen uniek bewustzijn dat zich parallel aan dat van de mens ontwikkelde Godfrey Smith brengt het buitengewone bewustzijn van deze opmerkelijke wezens in kaart en geeft daarmee een indringende nieuwe kijk op de intelligentie van de octopus die meer op ons lijkt dan we denken Een van de grootste puzzels van organisch leven is hoe en waarom bepaalde diersoorten zelfbewust worden Peter Godfrey Smith gebruikt de octopus als portaal naar niet menselijk bewustzijn en dat doet hij vol gevoel en kennis uit de eerste hand Frans de Waal Briljant De schoonheid van Godfrey Smiths boek zit in zijn heldere schrijfstijl Hij bewijst dat deze vreemde beeldschone wezens meer op ons lijken dan we bereid zijn toe te geven The Guardian Toward a Healthy Planet Gerard Magill, James Benedict, 2021-10-04 This volume addresses emerging concerns and pivotal problems about our planet's environment and ecology The contributions gathered here highlight the inter relation of topics and expertise regarding a vision for a healthy planet agriculture and food health and the environment global issues and generational perspectives The book concludes with an ethical analysis of the multiple and overlapping challenges that require urgent attention and long term resolution It will appeal to scholars and students in a variety of disciplines and fields that deal with the earth's survival and flourishing *Thinking with Water* Cecilia Chen, Janine MacLeod, Astrida Neimanis, 2013-10-01 Emphasizing the role that vivid personalities including engineers John Laing Weller and Alex Grant as well as contractors and labourers played in the construction of the canal Roberta Styran and Robert Taylor use archival sources government documents newspapers maps and original plans to describe a saga of technological financial geographical and social obstacles met and overcome in an accomplishment akin to the building of the Canadian Pacific Railway A story of Canadian skill courage vision and hardship This Colossal Project details the twenty year excavation of the giant channel and the creation of huge concrete locks amidst war the Great Depression political change and labour unrest **undercurrent** Rita Wong, 2015-04-18 The water belongs to itself undercurrent reflects on the power and sacredness of water largely underappreciated by too many whether it be in the form of ocean currents the headwaters of the Fraser River or fluids in the womb Exploring a variety of poetic forms anecdote allusion and visual elements this collection reminds humanity that we are water bodies and we need and deserve better ways of honouring this Poet Rita Wong approaches water through personal cultural and political lenses She humbles herself to water both physically and spiritually i will apprentice myself to creeks tributaries groundwater glaciers listen for the salty pulse within the blood that recognizes marine ancestry She witnesses the contamination of First Nations homelands and sites such as Gregoire Lake near Fort McMurray AB though you look placid peaceful dibenzothiophenes you hold bitter bitumized depths Wong points out that though capitalism and industry are supposed to improve our quality of life they're destroying the

very things that give us life in the first place Listening to and learning from water is key to a future of peace and creative potential undercurrent emerges from the Downstream project a multifaceted creative collaboration that highlights the importance of art in understanding and addressing the cultural and political issues related to water The project encourages public imagination to respect and value water ecology and sustainability Visit downstream.ecuad.ca [The New Triple Constraints for Sustainable Projects, Programs, and Portfolios](#) Gregory T. Haugan, 2016-04-19 The ongoing changes in population climate and the availability of energy have resulted in unprecedented threats and opportunities that all project and program managers portfolio managers and public planners need to be aware of The New Triple Constraints for Sustainable Projects Programs and Portfolios offers a clear look at how these constraints *downstream* Dorothy Christian, Rita Wong, 2017-02-24 *downstream* reimagining water brings together artists writers scientists scholars environmentalists and activists who understand that our shared human need for clean water is crucial to building peace and good relationships with one another and the planet This book explores the key roles that culture arts and the humanities play in supporting healthy water based ecology and provides local global and Indigenous perspectives on water that help to guide our societies in a time of global warming The contributions range from practical to visionary and each of the four sections closes with a poem to encourage personal freedom along with collective care This book contributes to the formation of an intergenerational culturally inclusive participatory water ethic Such an ethic arises from intellectual courage spiritual responsibilities practical knowledge and deep appreciation for human dependence on water for a meaningful quality of life *Downstream* illuminates how water teaches us interdependence with other humans and living creatures both near and far **About Canada: The Environment** Linda Pannozzo, 2016-12-20T00:00:00Z The environmental history of Canada is a bleak one Resource extraction has always put profits before conservation Settlers exploited both the land and the Indigenous peoples for commercial gain and big business continues that policy with forests fish minerals tar sands and pipelines As the Earth veers toward a biological tipping point as resources become scarcer and as climate change threatens our survival how is Canada responding What kind of future can Canadians expect What changes need to be made In *About Canada: The Environment* award winning author Linda Pannozzo examines the philosophical economic and ideological landscape of our current environmental worldview She connects our faith in the free market and our adherence to an economic system based on endless growth to illustrate the critical situation of Canada's environment Regulations and protections where they did exist have been eroded to benefit the bottom line and industrial expansion and resource extraction fueled by cheap energy and consumers insatiable demand for goods have taken an unprecedented environmental toll one that will only be worsened by the realities of climate change Ultimately Pannozzo argues the solution requires a profound shift in thinking personally politically and economically The inherent value of nature must be recognized for we cannot continue to destroy nature without ultimately destroying ourselves
