Art and Interpretation Eric Dayton, 1999-02-02 Art and Interpretation is a comprehensive anthology of readings on aesthetics Its aim is to present fundamental philosophical issues in such a way as to create a common vocabulary for those from diverse backgrounds to communicate meaningfully about aesthetic issues To that end the editor has provided selections from a wide variety of challenging works in aesthetic theory both classical and modern The approach is often cross disciplinary Within the discipline of philosophy it seeks to balance readings from the analytic tradition with continental European hermeneutical postmodern including deconstructionist and feminist readings The anthology is thus broadly conceived but by grouping the readings into sections such as Expression and Aesthetic object Psychology and Interpretation Marxist Theory and Culture Gender and Difference it aims as well to provide depth of coverage for each topic or issue The book opens with a historical section containing substantial selections from Plato Aristotle Hume Kant Shelley and Nietzsche these readings introduce themes that recur and are developed in the remainder of the anthology

Cold Modernism Jessica Burstein, 2012 Explores a significant but overlooked aspect of early twentieth century modernism one that focuses on surface appearance rather than interiority or psychological depth Looks at the writers Wyndham Lewis and Mina Loy the artists Balthus and Hans Bellmer and the fashion designer Coco Chanel Provided by publisher

The Technological Unconscious in German Modernist Literature Larson Powell, 2008 Even after the end of modernism and postmodernism the grandiose fantasies of artifice and self reference that have informed so much modernist literature still resonate in the social constructivism of current literary and cultural theory in the idea that we can perform or construct identities or social roles without external constraint as if we had consumer choice of self Larson Powell s book posits nature as a limit to such fantasies redefining aesthetic modernity s conception of and relation to nature and therefore its relation to reality He shows how nature no longer the idealized maternally coded Utopia of the Romantics becomes the trace of specific political sexual and technological traumas The book s four chapters center on the representation of nature in German prose and especially poetry by Rainer Maria Rilke Gottfried Benn Bertolt Brecht and Alfred Döblin from the years 1900 to 1945 while making reference to other literatures as well Powell s term the Technological Unconscious refers to a point of intersection between psychoanalysis and social and scientific theories of modernism and also to the philosophical

mediation between history and nature a motif important from Kant to Adorno Powell critiques the tendency toward jargon of an often merely rhetorical theory while continuing to develop the philosophical and conceptual inheritance of Continental traditions He analyzes in connection with the works treated the conceptions of subject and system in the theories of Adorno Luhmann and Lacan and their relation to their complement nature The Technological Unconscious is thus an important polemical intervention both in the debates over interdisciplinarity and in those between eclectic culturalist theories such as New Historicism and postcolonialism on the one hand and systems theory and psychoanalysis on the other Book Jacket

German Cities and Bourgeois Modernism, 1890-1924 Maiken Umbach, 2009-06-25 This is a study of a distinctive brand of modernism that first emerged in late nineteenth century Germany and remained influential throughout the inter war years and beyond Its supporters saw themselves as a new elite ideally placed to tackle the many challenges facing the young and rapidly industrializing German nation state They defined themselves as bourgeois and acted as self appointed champions of a modern consciousness Focusing on figures such as Hermann Muthesius Fritz Schumacher and Karl Ernst Osthaus and the activities of the Deutscher Werkbund and other networks of bourgeois designers writers and experts this book shows how bourgeois modernism shaped the infrastructure of social and political life in early twentieth century Germany Bourgeois modernism exercised its power not so much in the realm of ideas but by transforming the physical environment of German cities from domestic interiors via consumer objects to urban and regional planning Drawing on a detailed analysis of key material sites of bourgeois modernism and interpreting them in conjunction with written sources this study offers new insights into the history of the bourgeois mindset and its operations in the private and public realms Thematic chapters examine leitmotifs such as the sense of locality and place the sense of history and time and the sense of nature and culture Yet for all its self conscious progressivism German bourgeois modernism was not an inevitable precursor of neo liberal global capitalism It remained a hotly contested historical construct which was constantly re defined in different geographical and political settings
