Memory and the Wars on Terror Jessica Gildersleeve, Richard Gehrmann, 2017-10-24 This edited collection aims to respond to dominant perspectives on twenty first century war by exploring how the events of 9 11 and the subsequent Wars on Terror are represented and remembered outside of the US framework Existing critical coverage ignores the meaning of these events for people nations and cultures apparently peripheral to them but which have as shown in this collection been extraordinarily affected by the social political and cultural changes these wars have wrought Adopting a literary and cultural history approach the book asks how these events resonate and continue to show effects in the rest of the world with a particular focus on Australia and Britain It argues that such reflections on the impact of the Wars on Terror help us to understand what global conflict means in a contemporary context as well as what its representative motifs might tell us about how nations like Australia and Britain perceive and construct their remembered identities on the world stage in the twenty first century In its close examination of films novels memoir visual artworks media and minority communities in the years since 2001 this collection looks at the global impacts of these events and the ways they have shaped and continue to shape Britain and Australia s relation to the rest of the world *From Solidarity to Schisms*, 2009-01-01 From Solidarity to Schisms is the first collection to expand discussions of the effects the events of 11 September 2001 and their aftermath have had on fiction and film beyond an exclusively US based focus The essays brought together here go beyond critiquing the US to examine the cultural shifts taking place in fiction and cinema from places such as Britain France Germany Australia

Pakistan Canada Israel and Iran From these many sites of production the works discussed in this collection illustrate more precisely how 9 11 was global without succumbing to neat categorizations such as us vs them East vs West Christianity vs Islam and so on From Solidarity to Schisms is an important supplement to the US centered cultural and critical production addressing 9 11 providing researchers and teachers alike with resources and contexts that will allow them to broaden their own examinations of novels and films by Americans and about the US It also provides a valuable resource for students and scholars of contemporary global history and international politics who are interested in approaching 9 11 terrorism and counter terrorism and related topics from a cultural standpoint

The Universal Adversary Mark Neocleous, 2016-02-12 The history of bourgeois modernity is a history of the Enemy This book is a radical exploration of an Enemy that has recently emerged from within security documents released by the US security state the Universal Adversary The Universal Adversary is now central to emergency planning in general and more specifically to security preparations for future attacks But an attack from who or what This book the first to appear on the topic shows how the concept of the Universal Adversary draws on several key figures in the history of ideas said to pose a threat to state power and capital accumulation Within the Universal Adversary there lies the problem not just of the terrorist but more generally of the subversive and what the emergency planning documents refer to as the disgruntled worker This reference reveals the conjoined power of the contemporary mobilisation of security and the defence of capital But it also reveals much more Taking the figure of the disgruntled worker as its starting point the book introduces some of this worker's close cousins figures often regarded not simply as a threat to security and capital but as nothing less than the Enemy of all Mankind the Zombie the Devil and the Pirate In situating these figures of enmity within debates about security and capital the book engages an extraordinary variety of issues that now comprise a contemporary politics of security From crowd control to contagion from the witch hunt to the apocalypse from pigs to intellectual property this book provides a compelling analysis of the ways in which security and capital are organized against nothing less than the Enemies of all Mankind
