Physical Education Initiatives for Early Childhood Learners

Gil-Madrone, Pedro,2021-04-02 In early childhood education children find in their own body and movement the main way to get in touch with the reality that surrounds them and therefore acquire knowledge about the environment in which they grow and develop Undoubtedly the progressive discovery of the body itself as a source of feelings and sensations as well as exploring the different possibilities of action and bodily functions constitutes necessary experiences on which children s thinking is built Furthermore the affective relationships established in psychomotor education situations and particularly through play are essential for the emotional development of children Physical Education Initiatives for Early Childhood Learners offers globalized educational practices didactic approaches and proposals for intervention around motor development in the children ages 0 6 years The book specifically explores laterality coordination relaxation rhythm etc and how these are achieved through games music and motor stories This book is ideal for early childhood educators physical education teachers administrators daycares preschools early childhood learning centers researchers academicians and students interested in physical education s role in early child development

Pedagogical Cases in Physical Education and Youth Sport

Kathleen Armour,2014-01-21 Pedagogical Cases in Physical Education and Youth Sport is a completely new kind of resource for students and practitioners working in physical education or youth sport The book consists of 20 richly described cases of individual young learners each written by a team of authors with diverse

expertise from across the sport exercise and movement sciences These cases bring together knowledge from single sub disciplines into new interdisciplinary knowledge to inform best practice in physical education teaching and coaching in youth sport settings At the heart of each case is an individual young person of a specified age and gender with a range of physical social and psychological characteristics Drawing on current research theory and empirical data from their own specialist discipline each chapter author identifies the key factors they feel should be taken into account when attempting to teach or coach the young person described These strands are then drawn together at the end of each chapter and linked to current research from the sport pedagogy literature to highlight the implications for planning and evaluating teaching or coaching sessions No other book offers such a rich vivid and thought provoking set of pedagogical tools for understanding and working with children and young people in sport This is an essential resource for any student on a physical education coaching kinesiology or sport science course and for any teacher coach or instructor working in physical education or youth sport
