LYNNE MARIE REDICK

Primate Encounters Models Of Science Gender And Society

Garry Marvin, Susan McHugh

Primate Encounters Models Of Science Gender And Society:

Primate Encounters Shirley C. Strum, Linda Marie Fedigan, 2000 A study of primatology discussing its history the scientists in the field and the issues that have shaped its development particularly gender technology and the media

Routledge Handbook of Human-Animal Studies Garry Marvin, Susan McHugh, 2014-04-16 Human animal studies is an academic field that has grown exponentially over the past decade It explores the whys hows and whats of human animal relations why animals are represented and configured in different ways in human cultures and societies around the world how they are imagined experienced and given significance what these relationships might signify about being human and what about these relationships might be improved for the sake of the individuals as well as the communities concerned The Routledge Handbook of Human Animal Studies presents a collection of original essays from artists and scholars who have established themselves internationally on the basis of specific and significant new contributions to human animal studies This international interdisciplinary handbook will be of interest to students and scholars of human animal studies sociology anthropology biology environmental studies geography cultural studies history philosophy media studies gender studies literature psychology ethology and visual studies [Primate Life Histories, Sex Roles, and Adaptability](#) Urs Kalbitzer, Katharine M. Jack, 2018-10-29 Professor Linda M Fedigan Member of the Order of Canada and a Fellow of the Royal Society of Canada has made major contributions to our understanding of the behavioural ecology of primates Furthermore Linda Fedigan pioneered and continues to advance scholarship on the role of women in science as well as actively promoting the inclusion of women in the academy A symposium in honour of her career was held in Banff Alberta Canada in December 2016 during which former and current students and collaborators as well as scientists with similar research interests presented and discussed their work and their connections to Linda Fedigan These presentations and discussions are here presented as chapters in this festschrift The original works presented in this book are organized around four major research areas that have been greatly advanced and influenced by Linda Fedigan Primate life histories Sex roles gender and science Primate environment interactions Primate adaptation to changing environments **Centralizing Fieldwork** Jeremy MacClancy, Agustín Fuentes, 2010-12-01 Fieldwork is a central method of research throughout anthropology a much valued much vaunted mode of generating information But its nature and process have been seriously understudied in biological anthropology and primatology This book is the first ever comparative investigation across primatology biological anthropology and social anthropology to look critically at this key research practice It is also an innovative way to further the comparative project within a broadly conceived anthropology because it does not focus on common theory but on a common method The questions asked by contributors are what in the pursuit of fieldwork is common to all three disciplines what is unique to each how much is contingent how much necessary Can we generate well grounded cross disciplinary generalizations about this mutual research method and are there any telling differences Co edited by a social

anthropologist and a primatologist the book includes a list of distinguished and well established contributors from primatology and biological anthropology *Women Who Make a Fuss* Isabelle Stengers, Vinciane Despret, 2015-11-01 Virginia Woolf to whom university admittance had been forbidden watched the universities open their doors Though she was happy that her sisters could study in university libraries she cautioned women against joining the procession of educated men and being co opted into protecting a civilization with values alien to women Now as Woolf s disloyal unfaithful daughters who have professional positions in Belgian universities Isabelle Stengers and Vinciane Despret along with a collective of women scholars in Belgium and France question their academic careers and reexamine the place of women and their role in thinking both inside and outside the university They urge women to heed Woolf s cry Think We Must and to always make a fuss about injustice cruelty and arrogance **Chimpanzee Culture Wars** Nicolas Langlitz, 2020-09-08 Decades later starting in the 1980s Japanese cultural primatology was given a second look as Euro American primatologists began to debate amongst themselves the question of whether Homo sapiens is the only cultural animal In the most recent chapter of this controversy field researchers such as the Swiss primatologist Christophe Boesch have accused experimental psychologists such as Michael Tomasello of underestimating and even denying the capacity of chimpanzees for culture because they limit their studies to captive animals brought up under cognitively debilitating conditions and tested in laboratory settings bound to favor human test subjects with whom the animals are compared These controversies raise serious questions about what sort of laboratory culture is best for the study of primate cognition "Women, Workers, and Race in LIFE Magazine" Dolores Flamiano, 2017-07-05 The tension between social reform photography and photojournalism is examined through this study of the life and work of German gr ansel Mieth 1909 1998 who made an unlikely journey from migrant farm worker to Life photographer She was the second woman in that role after Margaret Bourke White Unlike her colleagues Mieth was a working class reformer with a deep disdain for Life s conservatism and commercialism In fact her work often subverted Life s typical representations of women workers and minorities Some of her most compelling photo essays used skillful visual storytelling to offer fresh views on controversial topics birth control vivisection labor unions and Japanese American internment during the Second World War Her dual role as reformer and photojournalist made her a desirable commodity at Life in the late 1930s and early 40s but this role became untenable in Cold War America when her career was cut short Today Mieth s life and photographs stand as compelling reminders of the vital yet overlooked role of immigrant women in twentieth century photojournalism *Women Workers and Race in LIFE Magazine* draws upon a rich array of primary sources including Mieth s unpublished memoir oral histories and labor archives The book seeks to unravel and understand the multi layered often contested stories of the photographer s life and work It will be of interest to scholars of photography history women s studies visual culture and media history Primate Ethnographies Karen B. Strier, 2016-01-08 Applies an ethnographic perspective to the study of primates *Primate Ethnographies* 1 e is a collection of first person

accounts of immersive field studies of primates people and institutions revealing the wide spectrum of primate science primatology Essays cover such primates as lemurs New World monkeys Old World monkeys and apes Readers experience the excitement of discovery and the challenges of primate field research Primate Ethnographies can be used as a textbook or a companion reader Researching Education and the Environment Alan Reid, William Scott, 2007-10-25 Previously published as a special issue of Environmental Education Research this collection includes some of the most influential and important articles contributed to the field over the last decade Drawing out the best articles from volumes one to ten the editors highlight six major themes EE and ESD tension or transition locating the environ **The Routledge Companion to Animal-Human History** Hilda Kean, Philip Howell, 2018-09-03 The Routledge Companion to Animal Human History provides an up to date guide for the historian working within the growing field of animal human history Giving a sense of the diversity and interdisciplinary nature of the field cutting edge contributions explore the practices of and challenges posed by historical studies of animals and animal human relationships Divided into three parts the Companion takes both a theoretical and practical approach to a field that is emerging as a prominent area of study Animals and the Practice of History considers established practices of history such as political history public history and cultural memory and how animal human history can contribute to them Problems and Paradigms identifies key historiographical issues to the field with contributors considering the challenges posed by topics such as agency literature art and emotional attachment The final section Themes and Provocations looks at larger themes within the history of animal human relationships in more depth with contributions covering topics that include breeding war hunting and eating As it is increasingly recognised that nonhuman actors have contributed to the making of history The Routledge Companion to Animal Human History provides a timely and important contribution to the scholarship on animal human history and surrounding debates
