The chapters are written by eminent and insightful authors to propose improvement and expansion of processes and applications connected to sustainable development. Environmental awareness and protection are one of the challenging issues of the new millennia. Industrialization and population explosion has opened new frontiers in the conservation of environmental protection. Rapid urbanization is proving to have direct consequences on the environment. The need of the hour is a balanced approach to multi-layered conservative methods. Any sustainable development has a multifaceted approach encompassing environmental, technological, social and economical developmental dimensions. This book focuses on these various issues in a progressive manner. The selected papers in this book have highlighted a plethora of issues related to green technology and sustainable development. Ample care has been

given to selecting the papers which tried to bridge the gap between technological advancement and its impact on the environment
