within it work As a project manager you will need to realize that people are inseparable from process It is not only practical skills but leadership ability management skills and the ability to communicate that are imperative to successful projects Benjamin Franklin wrote For want of a nail the shoe was lost for want of a shoe the horse was lost and for want of a horse the rider was lost being overtaken and slain by the enemy all for want of care about a horseshoe nail A small problem overlooked in the early stages of project management can grow to be a critical failure in the later stages The Initiating and Planning phases of project management are vital to the success of the project Without the proper tools and information effective project management is impossible Imagine what would happen if the head chef of a busy restaurant didn't have the right ingredients for the evening menu What do you think would happen if she didn't have a plan for efficiently preparing all of the meals during the supper rush If you don't initiate your project properly you might not have everything you need to meet your goals And if you don't plan your project well you might not meet your goals on time or at all This book examines the importance of properly initiating and planning a project and explores ways to make your initiating and planning efforts more effective Your project plan is complete Tasks are clearly outlined the schedule is in place and the money is budgeted to the cent You're getting ready to dig in and start the actual work You're feeling confident that the project is going to go exactly as planned How could anything go wrong Managing is the third phase of project management You may be tempted to think now that the planning is over the rest of the project will be easy
