As shown in subsequent empirical studies, these systems of training have been effective in helping children develop a more positive attitude toward mathematics. However, the results of these studies have been mixed. For example, some studies have found that these systems are effective in helping children develop a more positive attitude toward mathematics, while others have found that they are not effective.

Consequently, and with some additional evidence, it is not clear that the results are robust. Furthermore, it is difficult to control some factors (e.g. social desirability) in the study. Thus, the results are promising, but more research is needed. The authors suggest that it is important to continue to explore the relationship between the variables in the study.

Nuria Barahona Navarro, 2017-04-15 La Revolución Creativa impulsada por Bill Bernbach en EE UU en la década de 1950 ligó íntimamente la palabra creatividad al sector de la publicidad La creatividad como praxis publicitaria consiste en la elaboración y codificación del mensaje publicitario que se realiza a través de la ideación Pero cómo se mide el grado de creatividad de las ideas en publicidad Los festivales son la única herramienta Esta obra revisa el concepto de creatividad aplicado a la publicidad y ahonda en el conocimiento de los festivales publicitarios como herramienta para medirla radiografiando una realidad de la que todos son conscientes pero que no se ha expuesto desde una perspectiva teórica
