The Medium of Contingency 978-1-137-28654-3 Elie Ayache, 2016-06-15 In *The Medium of Contingency* Elie Ayache builds upon his ground breaking book *The Blank Swan* in exploring the intersection of philosophy and finance introducing new notions of price and market Inverting the received view he now sees a creation of matter in both the market and its metaphysics rather than pure speculation Once recognized as the proper medium of contingency and disassociated from the probabilistic and statistical tools traditionally used to model it the market can be thought as real in a new sense of reality corresponding to the new sense of matter To bring this new and original perspective *The Medium of Contingency* builds on probability theory as first formalized by von Mises and Kolmogorov and later revisited by Shafer and Vovk It utilises the author's extensive experience in derivatives pricing technology and software as well as his work in the philosophy of contingency and contingent claims to propose a new philosophical interpretation of Brownian motion and of the Black Scholes Merton formula Then it completes the overturning of the traditional view of the market by arguing that there should be no difference ultimately between an underlying asset and the derivative written on it This book does not aim to change the market but the way we must think of it It is the author's conviction that there can be no philosophy of the market and consequently no thinking of it without a philosophy of contingent claims and of derivative pricing The book provides the missing piece which the philosophy of probability cannot provide alone Its scope however extends beyond the strict critique of financial mathematics as it also and perhaps most importantly delivers the author's definitive treatment of the philosophically prominent and recently much discussed notion of contingency [Speculation as a Mode of Production](#)

Marina Vishmidt, 2018-10-16 In *Speculation as a Mode of Production* Forms of Value Subjectivity in Art and Capital Marina Vishmidt offers a new perspective on one of the main categories of capitalist life in the historical present Writing not under the shadow but in the spirit of Adorno's negative dialectic her work pursues speculation through its contested terrains of philosophy finance and art to arrive at the most detailed analysis that we now possess of the role of speculation in the shaping of subjectivity by value relations Featuring detailed critical discussions of recent tendencies in the artistic representation of labour and a brilliant reconstruction of the philosophical concept of the speculative from its origins in German Romanticism *Speculation as a Mode of Production* is an essential widescreen theorisation of capital's drive to self expansion and an urgent corrective to the narrow and one sided periodisations to which it is most commonly subjected

Ghosts of Transparency Michael R. Doyle, Selena Savić, Vera Bühlmann, 2019-09-23 In this book the editors focus on architecture and communication from various different perspectives taking into account that the term architecture is used for buildings as well as in the context of computer software Data and software also impact on our cities raw data however do not convey any information in order to generate information and communication they have to be organized and must make sense to the reader The contributions avoid clear separation of the various communication spheres of their disciplines

Instead they use the wide range of approaches to explore meanings an ambitious aim that leaves the destination wide open the reader is invited to share in this adventure

Rhythm and Critique Paola Crespi, 2020-07-23 Rhythm and Critique presents 12 new essays from a range of specialists to define contextualise and challenge the concepts of rhythm and rhythmanalysis It includes newly translated materials from Rudolf Laban and Henri Meschonnic The book begins with a genealogy of rhythm as it occurs through critical theory literatures of the 20th century enabling the reader to situate philosophical and contemporary readings that further define rhythm as a critical term and mode of analysis

Retracing Political Dimensions Oliver Grau, Inge Hinterwaldner, 2020-11-23 At the beginning of the 21st century new forms and dynamics of interplay are constituted at the interfaces of media art and politics Current challenges in society and ecology like climate surveillance virtualization of the global financial markets are characterized by hybrid and subtle technologies They are ubiquitous turn out to be increasingly complex and act invasively New media art utilizes its broad range of expression in order to tackle the most urgent topics through multi sensorial participatory and activist approaches This volume shows how media artists address with a political lens the core of these developments critically and productively With contributions by Elisa Arca Andr s Burbano Derek Curry Yael Eylat Van Essen Mathias Fuchs Jennifer Gradecki Sabine Himmelsbach Ingrid Hoelzl Katja Kwastek Jos Carlos Mari tegui Gerald Nestler Randall Packer Viola R hse Chris Salter

Construction Site for Possible Worlds Amanda Beech, Robin Mackay, James Wiltgen, 2020-08-11 Perspectives from philosophy aesthetics and art on how to envisage the construction site of possible worlds Given the highly coercive and heavily surveilled dynamics of the present moment when the tremendous pressures exerted by capital on contemporary life produces an aggressively normative official reality the question of the construction of other possible worlds is crucial and perhaps more urgent than ever This collection brings together different perspectives from the fields of philosophy aesthetics and art to discuss the mechanisms through which possible worlds are thought constructed and instantiated forcefully seeking to overcome the contemporary moment s deficit of conceptualizing alternate realities its apparent fear of imagining possible new and compelling futures to begin the arduous task of producing the political dynamics necessary for actual construction Implicit in this dynamic between the imaginary and the possible is the question of how thinking intertwines with both rationality and the inherited contingencies and structures of the world With no ascertainable ground on which to build with no confidence in any given that could guarantee our labors how do we even envisage the construction site s of possible worlds and with what kind of diagrams tools and languages can we bring them into being

Securing Urbanism Mark Laurence Jackson, Mark Hanlen, 2020-12-11 This book is concerned with developing an in depth understanding of contemporary political and spatial analyses of cities In the three part development of the book s overall argument or premise the reader is taken in Part I through a range of contemporary critical and political understandings of urban securitizing This is followed by an historical urban landscape of emerging liberalism and neo liberalism in nineteenth century Britain and twentieth century United States

respectively These case study historical chapters enable the introduction of key political issues that are more critically assayed in Parts II and III With Part II the reader is introduced in depth to a series of spatial analyses undertaken by Michel Foucault that have been crucial for especially late twentieth and twenty first century urban theory and political geography With Part III the full ramifications of a paradigmatic shift are explored at the level of rethinking territory population and design This book is timely and useful for readers who want to develop a stronger understanding of what the book s researchers term a new political paradigm in urban planning one ultimately governed by global economic forces that define the end of probability

The Politics of Uncertainty Ian Scoones, Andy Stirling, 2020-07-14 Why is uncertainty so important to politics today To explore the underlying reasons issues and challenges this book s chapters address finance and banking insurance technology regulation and critical infrastructures as well as climate change infectious disease responses natural disasters migration crime and security and spirituality and religion The book argues that uncertainties must be understood as complex constructions of knowledge materiality experience embodiment and practice Examining in particular how uncertainties are experienced in contexts of marginalisation and precarity this book shows how sustainability and development are not just technical issues but depend deeply on political values and choices What burgeoning uncertainties require lies less in escalating efforts at control but more in a new more collective mutualistic and convivial politics of responsibility and care If hopes of much needed progressive transformation are to be realised then currently blinkered understandings of uncertainty need to be met with renewed democratic struggle Written in an accessible style and illustrated by multiple case studies from across the world this book will appeal to a wide cross disciplinary audience in fields ranging from economics to law to science studies to sociology to anthropology and geography as well as professionals working in risk management disaster risk reduction emergencies and wider public policy fields

Fluid Futures Steven Shaviro, 2024-08-13 How does science fiction imagine forms of life that are plausible and yet different from anything that we already know Fluid Futures is about how science fiction imagines an open future Science fiction does not claim to predict what will actually happen in times to come But it offers pictures of potential developments it narrates the unfolding of possibilities for change that are already implicit or incipient in the present moment As Rod Serling said science fiction is the improbable made possible The book starts by looking at three tools that are commonly used in science fiction to address futurity extrapolation speculation and fabulation It goes on to consider concrete examples of how science fiction texts employ these tools to illustrate ways in which the future might be different from but not entirely discontinuous with the present day conditions with which we are familiar Fluid Futures insists upon the aboutness of science fiction as it depicts situations and ideas that are at once possible and difficult to grasp The book then explores how the genre embraces fictionality and narrative reconceives time and projects images of possible worlds The point of the book is not to give a theory of science fiction Instead it emphasizes the ways that science fiction texts themselves propose theories leading readers to reconceive

concepts that we have taken for granted **The Routledge Handbook of Critical Finance Studies** Christian Borch, Robert Wosnitzer, 2020-09-15 There has been an increasing interest in financial markets across sociology history anthropology cultural studies and related disciplines over the past decades with particular intensity since the 2007 2008 crisis which prompted new analyses of the workings of financial markets and how scandals of Wall Street might have huge societal ramifications The sociologically inclined landscape of finance studies is characterized by different more or less well established homogeneous camps with more micro empirical social studies of finance approaches on the one end of the spectrum and more theoretical often neo Marxist approaches on the other Yet alternative approaches are also gaining traction including work that emphasizes the cultural homologues and interconnections with finance as well as work that more broadly is both empirically rigorous and theoretically ambitious Importantly across these various approaches to finance a growing body of literature is taking shape which engages finance in a critical manner The term critical finance studies nonetheless remains largely unfocused and undefined Against this backdrop the key rationales of The Routledge Handbook of Critical Finance Studies are firstly to provide a coherent notion of this emergent field and secondly to demonstrate its analytical usefulness across a wide range of central aspects of contemporary finance As such the volume will offer a comprehensive guide to students and academics on the field of Finance and Critical Finance Studies Heterodox Economics Accounting and related Management disciplines Chapter 14 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license
