Decolonising Restorative Justice Leanne Alexis Levers,2023-09-01 This book critically examines the colonial dimensions of restorative justice through the lens of justice policy reform in Jamaica Restorative justice is not new Practices of restitution can be found throughout history predominantly in non Western traditions and religions One of the key principles of restorative practices is contextualisation That is restorative practices are developed and embedded within the political economic and cultural context of the communities in which they are practised Many of the countries that have gone on to develop restorative justice as part of their formal justice system have developed their policy on the model of their indigenous communities for example in Canada and in New Zealand However with the globalisation of restorative practices within the past decade many countries have sought to colonise restorative justice by developing a standardised best practice approach Instead of a practice that is developed and formed by its community colonised restorative justice dictates that one size fits all Examined through the lens of the development and implementation of restorative justice policies in Jamaica this book argues that this Westernised approach diminishes the effectiveness of restorative justice in its capacity to address the victim s needs to hold the offender accountable in a way that reintegrates them into society and to empower the community by involving them in the provision of justice to victims Restorative justice then must be decolonised and local indigenous practices acknowledged if it is to achieve its aims This book will be of interest to a range of scholars with interests in decolonisation as well as alternative dispute resolution especially those in sociolegal studies criminology human rights social policy political science and Caribbean studies

Building the Compensatory State Robert F. Durant,2019-09-24 Contemporary public administration research has marginalized the importance of taking history seriously With few exceptions little recent scholarship in the field has looked

longitudinally rather than cross sectionally contextually and theoretically over extended time periods at big questions in public administration One such big question involves the evolution of American administrative reform and its link since the nation's founding to American state building This book addresses this gap by analyzing administrative reform in unprecedented empirical and theoretical ways In taking a multidisciplinary approach it incorporates recent developments in cognate research fields in the humanities and social sciences that have been mostly ignored in public administration It thus challenges existing notions of the nature scope and power of the American state and with these important aspects of today's conventional wisdom in public administration Author Robert F Durant explores the administrative state in a new light as part of a compensatory state driven shaped and amplified since the nation's founding by a corporate social science nexus of interests Arguing that this nexus of interests has contributed to citizen estrangement in the United States he offers a broad empirical and theoretical understanding of the political economy of administrative reform its role in state building and its often paradoxical results Offering a reconsideration of conventional wisdom in public administration this book is required reading for all students scholars or practitioners of public administration public policy and politics

Tourism Public Policy, and the Strategic Management of Failure William Revill Kerr, 2003-09-04 First Published in 2003 The development of tourism and tourism public policy and the strategic management of failure of tourism to realize its commercial potential are all considered in this book The particular salience of this research lies in the fact that it has been conducted during an interesting politically and volatile globally period for the world's tourism industry Increasing competition economic and environmental issues combined with the continued threat of terrorism and instability in the Middle East necessitated governments assessing and redefining their tourism public policies How they approached this in the late nineties and new Millennium is reflected in the first part of the book The second part focuses on Scotland whose tourism public policy issues in the late nineties were focused concentrated and mutated by globalization political devolution and the restoration of the Scottish Parliament in 1999 In consequence tourism and economic development powers were devolved to Edinburgh from Westminster However other powers such as fiscal and employment policies which impacted greatly on tourism were reserved to Westminster a complex situation which the book has also set out to explain as it does the Scottish Parliament's inability to influence such powers During the lifetime of the first parliament in almost three hundred years Scottish tourism was confronted by significant challenges e.g. the foot and mouth epidemic the terrorist atrocities in the USA Indonesia and Kenya the combination of which for a short but crucial period virtually decimated North American tourism trade to Europe and of course recession
