## **Public Interest Private Property Planning:**

*Public Interest, Private Property* Anneke Smit, Marcia Valiante, 2015-12-15 At a time when pollution urban sprawl and condo booms are leading municipal governments to adopt prescriptive laws and regulations this book lays the groundwork for a more informed debate between those trying to preserve private property rights and those trying to assert public interests Rather than asking whether community interests should prevail over the rights of private property owners Public Interest Private Property delves into the heart of the argument to ask key questions Under what conditions should public interests take precedence And when they do in what manner should they be limited Drawing on case studies from across Canada the contributors examine the tensions surrounding expropriation smart growth tree bylaws green development and municipal water provision They also explore frustrations arising from the perceived loss of procedural rights in urban planning decision making the absence of a clear definition of public interest and the ambiguity surrounding the controls property owners have within a public planning system

**Handbook of Urban Studies** Ronan Paddison, 2001 The Handbook of Urban Studies provides the first comprehensive up to date account of the urban condition relevant to a wide readership from academics to researchers and policymakers It provides a theoretically and empirically informed account embracing all the different disciplines contributing to urban studies Leading authors identify key issues and questions and future trends for further research and present their findings so that where appropriate they are relevant to the needs of policymakers Using the city as a unifying structure the Handbook provides an holistic appreciation of urban structure and change and of the theories by which we understand the structure development and changing character , *Report on Land Planning ...* United States. National Resources Board. Land Planning Committee, 1935

Core-Themes of Land Use Politics Erwin Hepperle, 2011 The European Faculty of Land Use and Development is committed to an integrated multidisciplinary view on sustainable land management It regularly organizes interdisciplinary symposia This volume contains experiences and new approaches from the fields of geodesy geography and geo information land readjustment philosophy spatial planning jurisprudence and environmental sciences The contributions deal with questions of social and ecological development in different European regions that are relevant to land tenure systems and land use policy as well as with issues related to planning processes and procedures

Property Rights and Climate Change Fennie van Straalen, Thomas Hartmann, John Sheehan, 2017-09-14 Property Rights and Climate Change explores the multifarious relationships between different types of climate driven environmental changes and property rights This original contribution to the literature examines such climate changes through the lens of property rights rather than through the lens of land use planning The inherent assumption pursued is that the different types of environmental changes with their particular effects and impact on land use share common issues regarding the relation between the social construction of land via property rights and the dynamics of a changing environment Making these common issues explicit and discussing the different

approaches to them is the central objective of this book Through examining a variety of cases from the Arctic to the Australian coast the contributors take a transdisciplinary look at the winners and losers of climate change discuss approaches to dealing with changing environmental conditions and stimulate pathways for further research This book is essential reading for lawyers planners property rights experts and environmentalists **Instruments of Land Policy**

Jean-David Gerber,Thomas Hartmann,Andreas Hengstermann,2018-01-17 In dealing with scarce land planners often need to interact with and sometimes confront property right holders to address complex property rights situations To reinforce their position in situations of rivalrous land uses planners can strategically use and combine different policy instruments in addition to standard land use plans Effectively steering spatial development requires a keen understanding of these instruments of land policy This book not only presents how such instruments function it additionally examines how public authorities strategically manage the scarcity of land either increasing or decreasing it to promote a more sparing use of resources It presents 13 instruments of land policy in specific national contexts and discusses them from the perspectives of other countries Through the use of concrete examples the book reveals how instruments of land policy are used strategically in different policy contexts *Procedural Requirements for Administrative Limits to Property Rights* Martina

Conticelli,Thomas Perroud,2022-09-01 Through a comparative survey spanning twelve legal systems and a transnational regime the fourth volume in this series aims to shed light on the core of administrative activity that exemplifies the negative State Within the vast field of adjudication the book addresses one of the most traditional sets of procedures namely the exercise of public powers affecting property rights Following the method adopted in the CoCEAL project this volume takes the fundamentals of expropriation in a given legal order as its starting point and examines various cases The main requirements for property rights deprivations and restrictions are presented through national reports and discussed through hypotheticals while the comparative analysis focuses on procedural propriety and fairness This book is divided into three parts The first part introduces the project and the topic The second part covers the legal systems chosen for this study The third goes on to present a synchronic comparison across systems highlighting the relationship between shared and distinctive traits with a view to the way supranational and international rules increasingly supplement municipal regimes The concluding chapter discusses the current regime on public regulation of property in contemporary administrative systems
