your pet E zines are distributed to their subscribers normally through e mail Normally people send E zines to be published on a consistent pre planned basis For example an e mail will be sent out every day every three days weekly biweekly or monthly These E zines are distributed using an autoresponder An autoresponder is programmed for every subscriber to receive the e mails in a chronological format in a sequential order This is the biggest difference between an E zine and its offline counterpart An E zine can send previous issues anytime regardless of when the subscriber has opted in to the E zine The autoresponder will do its job of follow up from the day the subscriber has opted in and will follow through until its run is exhausted Today the majority of E zines are website driven It would be a surprising fact to know that the first E zines were delivered on an electronic format such as CD ROM and delivered to the subscriber s house by mail That was in the stone age when the power of e mails and autoresponders were not realized yet But now the majority of the formats stick with e mails or they send out notifications or updates in conjunction with websites or blogs The e mail usually contains the issue itself or a summarized format that ultimately links back to the original website for the main cheese
