Technological and Social Environments for Interactive Learning Jelena Jovanović, Raymond Chiong, 2014-11-03

Technology Enhanced Learning TEL is a very broad and increasingly mature research field It encompasses a wide variety of research topics ranging from the study of different pedagogical approaches and teaching learning strategies and techniques to the application of advanced technologies in educational settings such as the use of different kinds of mobile devices sensors and sensor networks to provide the technical foundation for context aware ubiquitous learning The TEL community has also been exploring the use of artificial intelligence tools and techniques for the development of intelligent learning environments capable of adapting to learners needs and preferences and providing learners with personalized learning experience Recognizing the potential of online social networks social media and web based social software tools as learning platforms for online education the TEL community has devoted significant time and effort into researching how these popular technologies could be combined with appropriate pedagogical approaches to make learning experience more engaging satisfying and successful Among the most important results of these research endeavors are personal learning environments that allow learners to create mash ups of diverse social software tools based on their own needs and preferences as well as to create and maintain their online learning networks Undeniably technological advancement is making education more accessible to an increasing number of people worldwide To fully exploit the huge benefit the technology is offering the TEL community is exploring effective approaches for adapting learning resources to address language generation and cultural specificities Aiming to make learning accessible to all the community has also focused on the development of solutions for learners with special needs Finally it should be noted that all the above mentioned research efforts of the TEL community are finding their applications in different learning contexts and domains including formal education and informal learning as well as workplace learning in small medium and large organizations Since the scope of TEL research is constantly evolving the above given overview of the current research efforts does not aim to be exhaustive by any means Instead its purpose is to give some insights into the breadth of research topics and challenges that this edited book aims to cover The book comprises 14 chapters which are topically organized into several sections However this division of chapters into sections is not strictly definitive as each of the chapters itself presents a

comprehensive research work that often spans across diverse TEL areas and thus could be categorized into more than one section of the book
