

Sensor Locations

Figure 7: Sensor Locations menu screen

Sensors installed on the vehicle are displayed in the Devices list on the left (LF = Left Front; RF = Right Front; LC = Left Center; RC = Right Center; LR = Left Rear; RR = Right Rear). Each sensor must be selected separately, and then the actual height it was installed on the vehicle is represented on the Height bar by dragging the green arrow up or down.

The actual position of each sensor on the vehicle will also need to be represented in the Plan view (depicted by the grey box on the right of the screen). Drag the sensor's corresponding circle (highlighted in green) to its actual installation location on the vehicle. Use the measurements given on the side, as the box is not to scale.

The EM sensors are represented by orange circles. The GPS antenna location is represented by a blue circle. Faulty sensors are colored red.

To delete a sensor from the list, if it is no longer required (eg. damaged), right-click or tap and hold the item in the Devices list.

Press the Rescan button to get immediate feedback about all currently connected sensors. If the Rescan button is colored red, it means there is no connection to the PAS-200 Aggregator.
