Sustainable Building Performance J. Vijayalaxmi, 2025-04-29 This book highlights the evaluation and assessment of various aspects of sustainable buildings to achieve a greener future India at the 26th session of the United Nations Framework Convention on Climate Change COP 26 in November 2021 announced its target to achieve net zero by 2070 Being an emerging economy the number of buildings required is expected to grow exponentially Hence there is a need for a pragmatic and realistic path to reach the committed goal of reaching net zero To participate in a global transition to clean low carbon energy systems which aligns with Sustainable Development Goal SDG 11 Sustainable Cities and Communities and Climate Action SDG 13 it is important to research cooling strategies for a tropical country like India The India Cooling Action Plan clearly acknowledges the deep connection between SDGs especially SDG 13 Passive cooling strategies require a micro level understanding of the impact of building materials on the thermal performance of buildings To contribute to the global transition to clean low carbon energy systems it is essential to assess India's energy retrofit policies the use of low carbon building materials energy efficient building design to enhance passive cooling ways to mitigate outdoor heat and learnings from vernacular architecture and biophilic building design This book explores how viable solutions such as these could

address some of India's most pressing challenges including energy efficiency climate resilience and environmental sustainability contributing to India's progress towards SDG 3 Good Health and Well-being SDG 7 Affordable and Clean Energy SDG 9 Industry Innovation and Infrastructure and SDG 13 The research papers presented in this book are the result of systematic research conducted after identifying a research gap through the latest review of literature They present new knowledge that can aid in making performance based design decisions All these aspects are analyzed using real time data obtained through field studies The book is a valuable resource for professionals and researchers working in energy efficiency and sustainable buildings

Tribal Reawakening and the Future of State-Building in Kuwait and Qatar Maryam Al-Kuwari, 2025-01-01 This open access book approaches the history of tribes and their role in the formation of the modern states of Kuwait and Qatar by blending historical political and sociological perspectives Traditionally this subject has been approached from single perspective often picturing the tribe as a political and social entity that is opposed to the modern state In the Gulf context presenting and discussing the case studies of Kuwait and Qatar aims at revealing that the tribe played a salient role in the formation of the modern state in these two countries as well as in nation building both before the oil era and even after independence Moreover the book bridges an important gap that is often overlooked in GCC studies which explains how the tribe suddenly became a controversial factor in Gulf states and societies The book elaborates on tracing the roots of this transformation and in evaluating the role played by the state as it attempted to manipulate tribes to achieve political and other advantages only to trigger the rise of tribalism as a social and at times political force that undermines the legitimacy of the state The book also highlights the impacts of this transformation not only on the state but also on society as a whole with special emphasis on women in Kuwait and Qatar It is relevant to scholars and advanced students in areas of political sociology identity and gender comparative politics and for social scientists more broadly with a specific interest in the Middle East
