Russell Hoban Graeme Wend-Walker, 2025-09-24 Spanning more than half a century, Russell Hoban's celebrated literary career won him critical accolades and legions of admirers across multiple genres. Many know him from the groundbreaking masterpiece *Riddley Walker* with its twelve-year-old protagonist contemplating what the ideal of us might be from amidst the ruins of civilization. Others know Hoban from the genre-defying *The Mouse and His Child* or from idiosyncratic novels of floundering Londoners. Still others fondly recall Frances the Badger's refusal to go to bed or share Emmet Otter with their children at Christmas. This book is the first consideration of Russell Hoban's literary career as a whole, explores what binds these seemingly disparate works together, discovering unexpected patterns between books written from what one character describes as a perpetual state of surprise. This critical study also draws on Hoban's biography from his formation as an artist under the influence of jazz in New York to the upheaval of his self-reinvention as a writer as it offers its own reflection on what the idea of Russell Hoban might be.

The Seven Beauties of Science Fiction Istvan Csicsery-Ronay, 2012-10-01 This major critical work from one of the preeminent voices in science fiction scholarship reframes the genre as a way of understanding today's world. As the application of technoscience increasingly transforms every aspect of life, science fiction has become an essential mode of imagining the horizons of possibility. Though the broad scope of science fiction may vary in artistic quality and sophistication, it shares a desire to imagine a collective future for the human species and the world. A strikingly high proportion of today's films, commercial art, popular music, video games, and non-genre fiction are what Csicsery-Ronay calls science fictional, stimulating science fictional habits of mind. We no longer treat science fiction as merely a genre engine producing formulaic effects but as a mode of awareness which frames experiences as if they were aspects of science fiction. *The Seven Beauties of Science Fiction* describes science fiction as a constellation of seven diverse cognitive attractions that are particularly formative of science fictionality. These are the seven beauties of the title: fictive neology, fictive novums, future history, imaginary science, the science fictional sublime, the science fictional grotesque, and the Technologiade or the epic of technoscience's development into a global regime.
