Philosophy and Theory of Artificial Intelligence Vincent C. Müller, 2012-08-23 Can we make machines that think and act like humans or other natural intelligent agents The answer to this question depends on how we see ourselves and how we see the machines in question Classical AI and cognitive science had claimed that cognition is computation and can thus be reproduced on other computing machines possibly surpassing the abilities of human intelligence This consensus has now come under threat and the agenda for the philosophy and theory of AI must be set anew re defining the relation between AI and Cognitive Science We can re claim the original vision of general AI from the technical AI disciplines we can reject classical cognitive science and replace it with a new theory e g embodied or we can try to find new ways to approach AI for example from neuroscience or from systems theory To do this we must go back to the basic questions on computing cognition and ethics for AI The 30 papers in this volume provide cutting edge work from leading researchers that define where we stand and where we should go from here

An Anthology of Global Risk SJ Beard, Tom Hobson, 2024-09-03 This anthology brings together a diversity of key texts in the emerging field of Existential Risk Studies It serves to complement the previous volume *The Era of Global Risk An Introduction to Existential Risk Studies* by providing open access to original research and insights in this rapidly evolving field At its heart this book highlights the ongoing development of new academic paradigms and theories of change that have emerged from a community of researchers in and around the Centre for the Study of Existential Risk The chapters in this book challenge received notions of human extinction and civilization collapse and seek to chart new paths towards existential security and hope The volume curates a series of research articles including previously published and unpublished work exploring the nature and ethics of catastrophic global risk the tools and methodologies being developed to study it the diverse drivers that are currently pushing it to unprecedented levels of danger and the pathways and opportunities for reducing this In each case they go beyond simplistic and reductionist accounts of risk to understand how a diverse range of factors interact to shape both catastrophic threats and our vulnerability and exposure to them and reflect on different stakeholder communities policy mechanisms and theories

of change that can help to mitigate and manage this risk Bringing together experts from across diverse disciplines the anthology provides an accessible survey of the current state of the art in this emerging field The interdisciplinary and trans disciplinary nature of the cutting edge research presented here makes this volume a key resource for researchers and academics However the editors have also prepared introductions and research highlights that will make it accessible to an interested general audience as well Whatever their level of experience the volume aims to challenge readers to take on board the extent of the multiple dangers currently faced by humanity and to think critically and proactively about reducing global risk

AI Roman V. Yampolskiy, 2024-02-23 Delving into the deeply enigmatic nature of Artificial Intelligence AI AI Unexplainable Unpredictable Uncontrollable explores the various reasons why the field is so challenging Written by one of the founders of the field of AI safety this book addresses some of the most fascinating questions facing humanity including the nature of intelligence consciousness values and knowledge Moving from a broad introduction to the core problems such as the unpredictability of AI outcomes or the difficulty in explaining AI decisions this book arrives at more complex questions of ownership and control conducting an in depth analysis of potential hazards and unintentional consequences The book then concludes with philosophical and existential considerations probing into questions of AI personhood consciousness and the distinction between human intelligence and artificial general intelligence AGI Bridging the gap between technical intricacies and philosophical musings AI Unexplainable Unpredictable Uncontrollable appeals to both AI experts and enthusiasts looking for a comprehensive understanding of the field whilst also being written for a general audience with minimal technical jargon

Ethics of Artificial Intelligence S. Matthew Liao, 2020-08-18 This is the first volume to provide an overview of critical perspectives on the ethics of Artificial Intelligence AI at a point when growth in AI technologies has exploded but the study of the difficult moral problems presented by AI use is only in its infancy The book features seventeen essays organized into four sections written by leading academics and prominent figures in the field many representing well known big tech companies Some topics covered include self driving cars and autonomous drones caretaking robots and the possible consciousness of superintelligent AI systems

Artificial Intelligence in Biobanking Michaela Th. Mayrhofer, Santa Slokenberga, Signe Mežinska, 2025-08-21 This insightful collection highlights the ethical legal and societal issues associated with the increasing role played by artificial intelligence AI in medical biobanks a key research resource in the global study of disease prevention and improving individual care Although AI has the potential to speed up health research the book considers numerous questions that the technology poses from the building of trust to the prevention of harm to individuals vulnerable groups or entire populations Examining the tension between scientific progress and safeguarding of individual rights and covering key issues such as accountability data bias transparency and liability the book considers the legal landscape in which biobanks operate and what layers of governance are required to oversee such an important resource in a fluid technological age A timely volume that brings together scholars and experts from social sciences ethics and law this important book will interest
