Roadside Design Guide American Association of State Highway and Transportation Officials. Task Force for Roadside Safety, 2011 The Roadside Design Guide presents a synthesis of current information and operating practices related to roadside safety and is written in dual units metric and U S Customary This book is a guide It is not a standard nor is it a design policy It is intended to use as a resource document from which individual highway agencies can develop standards and policies Although much of the material in the guide can be considered universal in its application several recommendations are subjective in nature and may need modification to fit local conditions However it is important that significant deviations from the guide be based on operational experience and objective analysis The 2011 edition of the AASHTO Roadside Design Guide has been updated to include hardware that has met the evaluation criteria contained in the National Cooperative Highway Research Program NCHRP Report 350 Recommended Procedures for the Safety Performance Evaluation of Highway Features and begins to detail the most current evaluation criteria contained under the Manual for Assessing Safety Hardware 2009 MASH For the most part roadside hardware tested and accepted under older guidelines that are no longer applicable has not been excluded in this edition AASHTO website **Urban Transport XVII** Antonio Pratelli, C. A. Brebbia, 2011 the 17th International Conference held in Pisa Italy Pref Review of Crash Reduction Factors (CRF) for Use in the Highway Safety Improvement Program Handbook Randy Kinney, 2009 This report reviews the crash cost reduction factors for countermeasures currently listed in the Alaska Department of Transportation and Public Facility s Highway Safety Improvement Program HSIP Handbook HSIPHB and provides revised values based on a literature survey of research and references In addition crash cost reduction factors are proposed for the five treatments that are not currently listed in the HSIPHB including cable barrier median barriers pavement traction enhancement flashing yellow arrow left turn indications HAWK pedestrian signals and concrete median barriers There is also a section on practices by other state DOT organizations Alaska HSIP data is evaluated for safety effectiveness and the report provides an analysis and recommendations for the HSIP post evaluation process This project and report also included research of the effectiveness of Active Advance Warning Flashers AAWF and shoulder rumble strips based upon Alaskan crash experience **Highway Engineering** Athanassios Nikolaidis, 2014-11-24 An International Textbook from A to Z Highway Engineering Pavements Materials and Control of Quality covers the basic principles of pavement management highlights recent advancements and details the latest industry standards and techniques in the global market Utilizing the author s more than 30 years of teaching researching and consulting e **Development of a Low-cost, Energy-absorbing Bridge Rail** Jeffrey C. Thiele, 2010 *Analysis of Safety Benefits for Shielding of Bridge Piers* Thomas J. McDonald, 2009 The highway system in the State of Iowa includes many grade separation structures constructed to provide maximum safety and mobility to road users on intersecting roadways However these structures can present possible safety concerns for traffic passing underneath

due to close proximity of piers and abutments Shielding of these potential hazards has been a design consideration for many years This study examines historical crash experience in the State of Iowa to address the advisability of shielding bridge piers and abutments as well as other structure support elements considering the offset from the traveled way A survey of nine Midwestern states showed that six states had bridge pier shielding practices consistent with those in Iowa Data used for the analyses include crash data 2001 to 2007 from the Iowa Department of Transportation Iowa DOT the Iowa DOT s Geographic Information Management System GIMS structure and roadway data 2006 obtained from the Office of Transportation Data and shielding and offset data for the bridges of interest Additionally original crash reports and the Iowa DOT video log were also utilized as needed Grade separated structures over high speed multilane divided Interstate and primary highways were selected for analysis including 566 bridges over roadways with a speed limit of at least 45 mph Bridges that met the criteria for inclusion in the study were identified for further analysis using crash data The study also included economic analysis for possible shielding improvement
